Magic, Rhetoric, and Literacy William A. Covino, 1994-01-01

This book presents a selective introductory reading of key texts in the history of magic from antiquity forward in order to construct a suggestive conceptual framework for disrupting our conventional notions about rhetoric and literacy Offering an overarching pointed synthesis of the interpenetration of magic rhetoric and literacy William A Covino draws from theorists ranging from Plato and Cornelius Agrippa to Paulo Freire and Mary Daly and analyzes the different magics that operate in Renaissance occult philosophy and Romantic literature as well as in popular indicators of mass literacy such as The Oprah Winfrey Show and The National Enquirer Magic Rhetoric and Literacy distinguishes two kinds of magic rhetoric that continue to affect our psychological and cultural life today Generative magic rhetoric creates novel possibilities for action within a broad sympathetic universe of signs and symbols Arresting magic rhetoric attempts to induce automatistic behavior by inculcating rules and maxims that function like magic ritual formulas JUST SAY NO In this connection the literate individual is one who can interrogate arresting language and generate counter spells

A Cognitive Theory of Magic

Jesper Sørensen, 2007 Magic is a universal phenomenon Everywhere we look people perform ritual actions in which desirable qualities are transferred by means of physical contact and objects or persons are manipulated by things of their likeness In this book Sørensen embraces a cognitive perspective in order to investigate this long established but controversial topic Following a critique of the traditional approaches to magic and basing his claims on classical ethnographic cases the author explains magic's universality by examining a number of recurrent cognitive processes underlying its different manifestations He focuses on how power is infused into the ritual practice how representations of contagion and similarity can be used to connect otherwise distinct objects in order to manipulate one by the other and how the performance of ritual prompts representations of magical actions as effective Bringing these features together the author proposes a cognitive theory of how people can represent magical rituals as purposeful actions and how ritual actions are integrated into more complex representations of events This explanation in turn yields new insights into the constitutive role of magic in the formation of institutionalised religious ritual

Witchcraft in Early Modern Europe Jonathan Barry, Marianne Hester, Gareth

Roberts, 1996 This important collection brings together both established figures and new researchers to offer fresh perspectives on the ever controversial subject of the history of witchcraft Using Keith Thomas's Religion and the Decline of Magic as a starting point the contributors explore the changes of the last twenty five years in the understanding of early modern witchcraft and suggest new approaches especially concerning the cultural dimensions of the subject Witchcraft cases must be understood as power struggles over gender and ideology as well as social relationships with a crucial role played by alternative representations Witchcraft was always a contested idea never fully established in early modern culture but much harder to dislodge than has usually been assumed The essays are European in scope with examples from Germany France

and the Spanish expansion into the New World as well as a strong core of English material **The Barbarian Temperament** Stepan Mestrovic, 2013-07-23 This scintillating book by one of the most interesting young sociologists currently working in the USA is a provocative and timely contribution to the debate on civilization modernity and postmodernity The author argues that modernity never jettisoned barbarism Instead barbarism was repackaged in modern and postmodern traditions and cultures **Power and Magic in Italy** Thomas Hauschild, 2011-03 Published in Association with the European Association of Social Anthropologists **Tsewa's Gift** Michael F. Brown, Michael Brown, 2006-01-31 A well written and carefully crafted account of Aguaruna magic and its practical applications that diverges from more traditional approaches by focusing not only on the symbolic realm of magic but also on the instrumental intent American Anthropologist **Handbook of Religion and the Authority of Science** Jim R. Lewis, Olav Hammer, 2010-11-19 There has been a significant but little noticed aspect of the interface between science and religion namely the widespread tendency of religions to appeal to science in support of their truth claims Though the appeal to science is most evident in more recent religions like Christian Science and Scientology no major faith tradition is exempt from this pattern Members of almost every religion desire to see their truths supported by the authority of science especially in the midst of the present historical period when all of the comforting old certainties seem problematic and threatened The present collection examines this pattern in a wide variety of different religions and spiritual movements and demonstrates the many different ways in which religions appeal to the authority of science The result is a wide ranging and uniquely compelling study of how religions adapt their message to one of the major challenges presented by the contemporary world **Masks and Masking** Gary Edson, 2015-07-11 For at least 20 000 years masking has been a mark of cultural evolution and an indication of magical religious sophistication in society This book provides a comprehensive understanding of the mask as a powerful cultural phenomenon a means by which human groupings attempted to communicate their dignity and sense of purpose as well as establish a continuum between the natural and supernatural worlds It addresses the distinctive environments within which masks flourished and analyzes the mask as a manifestation of art ethnology and anthropology **The Poetics of Psychoanalysis** Mary Jacobus, 2005-12-22 The Poetics of Psychoanalysis In the Wake of Klein explores the literary aspects of the twentieth century psychoanalytic tradition that has come to be known as British Object Relations psychoanalysis Focusing on Melanie Klein s legacy to psychoanalysis between the 1930s and 1970s it deals with major figures such as Riviere Isaacs Winnicott Milner and Bion as well as Klein s contemporary Ella Sharpe Mary Jacobus breaks new ground by giving a central place to the literary and aesthetic concerns of the British Object Relations tradition Paying close attention to writing that is often side lined by literary critics and theorists she makes fruitful connections with particular works of literature and art along with pressing contemporary issues The three sections focus on the transitions mediations and transformations that took place in British Object Relations psychoanalysis as Klein s ideas were developed and transformed Situating Kleinian thought in relation to later developments

and differences while making it accessible to non psychoanalytic readers The Poetics of Psychoanalysis argues against the separation of British and continental traditions and for the continuing links between psychoanalysis and aesthetics Rather than applying psychoanalytic ideas to literature and aesthetics the book traces the British Object Relations tradition as a form of proto modernist discourse in its own right Linked by a common thread of ideas and structured to reflect a roughly chronological trajectory individual chapters can also be read as free standing critical essays Aimed at literary readers this book will also be of interest to psychoanalytic practitioners and cultural theorists

Divination in Ancient Israel and its Near Eastern Environment Frederick H. Cryer,1994-05-01 In this revealing study the author suggests that ancient Israel was a magic society like those around it and similar in many respects to a number of magic using savage societies studied by modern social anthropology Although the Old Testament attempts to distinguish between priestly and prophetic divination this distinction was not sharply drawn in ancient times References to divination in fact are found in all genres of Israelite literature implying that many of these practices were performed throughout Israelite society Cryer s investigation of divination in ancient Israel is a masterful synthesis of social and historical analyses of an important yet neglected topic Ronald E Simkins Catholic Biblical Quarterly

Marketing, Rhetoric and Control Christopher Miles, 2018-04-19 Marketing Rhetoric and Control investigates the tensions that surround the place of persuasion and more broadly control in marketing Persuasion has variously been seen as an embarrassment to the discipline a target for anti marketing sentiment the source of marketing s value in the modern organisation a mysterious black box inside the otherwise rational and logical endeavour of enterprise and a rather insignificant part of the marketing programme This book argues that this multifarious reputation for persuasion within marketing stems from the influence of two quite oppositional paradigms the scientific and the magico rhetorical that ebb and flow across the discourses of its discipline and practice Constructing an interface between original challenging close readings of texts from the beginnings of the Western rhetorical tradition and an examination of the ways in which marketing has set about describing itself this text argues for a Sophistic interpretation of marketing From this perspective marketing is understood as providing intermediary services to facilitate the continuing exchange of attention and regard between firm client and stakeholders It seeks to manage and direct this exchange through an appreciation of the changing rational and irrational motivations of the firm and stakeholders using these as resources for the construction of both planned and improvised persuasive interactions in agonistic or competitive environments This book is aimed primarily at researchers and academics working in the fields of marketing marketing communications and the related disciplines of marketing theory critical marketing and digital marketing It will also be of value to marketing academics in business schools including those working in the areas of media and communication studies who have an interest in commercial and corporate communication brand use of interactive media and communication theory **From Mouse to Mermaid** Elizabeth Bell, Lynda Haas, Laura Sells, 1995-11-01 A collection of essays that explicate Disney ideology through fifty five years of feature films including Bambi

Trust, Risk and Uncertainty S. Watson,A. Moran,2005-06-07 The themes trust risk and uncertainty seem especially

pertinent in the context of the post 9 11 world This book brings together a range of new research with a focus on the risk society debate and on the themes of trust uncertainty and ambivalence Where much of the work within these crucial debates in the social sciences has been theory based and theory driven Trust Risk and Uncertainty combines theoretical sophistication with empirical analysis and research in the fields of philosophy education social policy government health and social care sociology and media and cultural studies Descenders to the Chariot James Davila, 2021-11-22 The Hekhalot literature is a bizarre conglomeration of Jewish esoteric and revelatory texts in Hebrew and Aramaic produced sometime between late antiquity and the early Middle Ages and surviving in medieval manuscripts These texts claim to describe the self induced spiritual experiences of the descenders to the chariot and to reveal the techniques that permitted these magico religious practitioners to view for themselves Ezekiel s Merkavah as well as to gain control of angels and a supernatural mastery of Torah Drawing on epigraphic and archaeological evidence from the Middle East anthropological models and a wide range of cross cultural evidence this book aims to show that the Hekhalot literature preserves the teachings and rituals of real religious functionaries who flourished in late antiquity and who were quite like the functionaries anthropologists call shamans
