Conceptualising Child-Adult Relations Leena Alanen,Berry Mayall,2002-11-01 Conceptualising Child Adult Relations focuses on how children conceptualise and experience child adult relations The authors explore the idea of generation as a key to understanding children s agency in intersection with social worlds which are largely organised and ordered by adults The authors explore two interconnected themes how children define the division of labour between children and adults and how far children regard themselves as constituting a seperate group This book is ground breaking in its focus on the variety and commonality in children s lives and views across a broad range of contexts It provides innovative theoretical approaches to the growing study of childhood by homing in on intergenerational relations as a main concept and draws attention to links across the main sites of children s lives such as the home neighbourhood and school Moreover for policy related issues this book provides food for thought about the social conditions and status of childhood and the factors structuring it

**Indigenous Studies and Engaged Anthropology** Paul Sillitoe,2016-05-23 Advancing the rising field of engaged or participatory anthropology that is emerging at the same time as increased opposition from Indigenous peoples to research this book offers critical reflections on research approaches to date The engaged approach seeks to change the researcher researched relationship fundamentally to make methods more appropriate and beneficial to communities by involving them as participants in the entire process from choice of research topic onwards The aim is not only to change power relationships but also engage with non academic audiences The advancement of such an egalitarian and inclusive approach to research can provoke strong opposition Some argue that it threatens academic rigour and worry about the undermining of disciplinary authority Others point to the difficulties of establishing an appropriately non ethnocentric moral stance and navigating the complex problems communities face Drawing on the experiences of Indigenous scholars anthropologists and development professionals acquainted with a range of cultures this book furthers our understanding of pressing issues such as interpretation transmission and ownership of Indigenous knowledge and appropriate ways to represent and communicate it All the contributors recognise the plurality of knowledge and incorporate perspectives that derive at least in part from other ways of being in the world      **Dictionary of Genocide** Paul R.
