Twenty-Third Annual Collection Gardner Dozois, 2006-07-11 Collects short stories exploring themes of time and space travel self discovery and science and technology Notional Identities Thomas Christie, 2014-07-18 Notional Identities takes up the challenge of engaging with the popular genres of speculative fiction and crime fiction by Scottish authors from the mid 1970s until the beginning of the twenty first century examining a variety of significant novels from across the decades in the light of wider considerations of ideology genre and national identity. The book investigates the extent to which the national political and cultural climate of this tumultuous era informed the narrative form and social commentary of such works and considers the manner in which and the extent to which a specific and identifiably Scottish response to these ideological matters can be identified in popular prose fiction during the period under discussion Although Scottish literary fiction of recent decades has been studied in considerable depth Scottish popular genre literature has received markedly less critical scrutiny in comparison Notional Identities aims to help in redressing this balance examining popular Scottish texts of the stated period in order to reflect upon whether a significant relationship can be discerned between genre fiction and the mainstream of Scottish literary writing and to consider the characteristics of the literary connections which exist between these different modes of writing Science Fiction and Empire Patricia Kerslake, 2007-01-01 From its beginnings science fiction has experimented with imperialistic scenarios of alien invasion extraterrestrial exploitation xenophobia and colonial conquest In Science Fiction and Empire Patricia Kerslake brings contemporary thinking about postcolonialism and imperialism to bear on a variety of classic sci fi novels and films including The War of the Worlds Stanislaw Lem s Solaris and Star Wars The first book to identify the consequences of empire in science fiction Kerslake's study is a compelling investigation of the political ramifications of how we imagine our future Science Fiction and Empire is thought provoking and insightful the kind of large scale postcolonial work that science fiction has needed for quite some time Science Fiction Studies
