**A Colossal Hoax** Scott Tribble, 2008-12-16 In October 1869 as America stood on the brink of becoming a thoroughly modern nation workers unearthed what appeared to be a petrified ten foot giant on a remote farm in upstate New York The discovery caused a sensation Over the next several months newspapers devoted daily headlines to the story and tens of thousands of Americans including Oliver Wendell Holmes Ralph Waldo Emerson and the great showman P T Barnum flocked to see the giant on exhibition In the colossus many saw evidence that their continent and the tiny hamlet of Cardiff had ties to Biblical history American science also weighed in on the discovery and in doing so revealed its own growing pains including the shortcomings of traditional education the weaknesses of archaeological methodology as well as the vexing presence of amateurs and charlatans within its ranks A national debate ensued over the giant's origins and was played out in the daily press Ultimately the discovery proved to be an elaborate hoax Still the story of the Cardiff Giant reveals many things about America in the post Civil War years After four years of destruction on an unimagined scale Americans had increasingly turned their attention to the renewal of progress But the story of the Cardiff Giant seemed to shed light on a complicated mysterious past and for a time scientists clergymen newspaper editors and ordinary Americans struggled to make sense of it Hucksters of course did their best to take advantage of it The Cardiff Giant was one of the leading questions of the day and how citizens answered it said much about Americans in 1869 as well as about America more generally

**The Mound Builder Myth** Jason Colavito,2020-02-20 Say you found that a few dozen people operating at the highest levels of society conspired to create a false ancient history of the American continent to promote a religious white supremacist agenda in the service of supposedly patriotic ideals Would you call it fake news In nineteenth century America this was in fact a powerful truth that shaped Manifest Destiny The Mound Builder Myth is the first book to chronicle the attempt to recast the Native American burial mounds as the work of a lost white race of true native Americans Thomas Jefferson s pioneering archaeology concluded that the earthen mounds were the work of Native Americans In the 1894 report of the Bureau of American Ethnology Cyrus Thomas concurred drawing on two decades of research But in the century in between the lie took hold with Presidents Andrew Jackson William Henry Harrison and Abraham Lincoln adding their approval and the Mormon Church among those benefiting Jason Colavito traces this monumental deception from the farthest reaches of the frontier to the halls of Congress mapping a century long conspiracy to fabricate and promote a false ancient history and enumerating its devastating consequences for contemporary Native people Built upon primary sources and first person accounts the story that The Mound Builder Myth tells is a forgotten chapter of American history but one that reads like the Da Vinci Code as it plays out at the upper reaches of government religion and science And as far fetched as it now might seem that a lost white race once ruled prehistoric America the damage done by this ancient myth has clear echoes in today s arguments over white nationalism multiculturalism alternative facts and the role of science and the control of knowledge in public life

W. Douglas Smith, 2024-04-26 Every civilization in history has faced moments of overwhelming existential crises and they all eventually collapsed Was this failure inherent in the evolution of civilization something within the human species or a combination of both More importantly was it predictable and unavoidable Most civilizations believed they had a special relationship with the divine and were beyond the laws of nature Our current economic civilization is now global and interdependent Today s economy is responsible for the most rapid mass extinction in Earth s history We face imminent catastrophic climate change and environmental disruption yet the same sense of exceptionalism and hubris clouds humanity s judgement and ability to act rationally Environmental disruption is making the planet uninhabitable No economy can consume its way out of scarcity This law of nature conflicts with many longstanding economic theories Sheltered and self absorbed elitists promote lies and prey on humanity s most vulnerable instincts of pecking order conformity and obedience to authority These primal instincts may be maladapted to civilization in its current form Today s elitists are choosing mass extinction in a false belief in their own invincibility To survive humanity can no longer follow delusional leaders to self destruction In non technical language the author explores common phases in the development of past civilizations and the critical junctures and decisions that made collapse inevitable He investigates the linkages and contradictions between human social behavior the economy and the environment In the closing pages he identifies a clear path to redemption **A**
