Stonehenge A New Interpretation Of Prehistoric Man And The Cosmos:

Stonehenge John David North,1996 Argues that Stonehenge s scientific purpose was to observe the setting midwinter sun and that astronomical observations made by the ancient Britons were as rational and methodical as they are today

Stonehenge John North,1999-02-01 North has spent 15 years studying Stonehenge the great ancient stone monument on Salisbury Plain in southern England He brings a fresh interpretation which conclusively solves the riddle of Stonehenge He reveals the religious purpose enshrined in the ancient earthworks He irrefutably shows that they were directed at the heavens in a scientific way in the earliest cases to the risings and settings of the stars later to those of the Sun and Moon His extensive research counters received wisdom including that Stonehenge was dedicated to observation not of the rising midsummer sun but of the setting midwinter sun Photos Stonehenge John North,2007-09-10 Argues that Stonehenge s

scientific purpose was to observe the setting midwinter sun and that astronomical observations made by the ancient Britons were as rational and methodical as they are today **Astronomy and Culture** Edith W. Hetherington,NorriSS S.

Hetherington,2009-05-20 While astronomy is a burgeoning science with tremendous increases in knowledge every year it also has a tremendous past one that has altered humanity s understanding of our place in the universe The impact of astronomy on culture whether through myths and stories or through challenges to the intellectual status quo is incalculable This volume in the Greenwood Guides to the Universe series examines how human cultures in all regions and time periods have tried to make sense of the wonders of the universe Astronomy and Culture shows students how people throughout time have struggled with the complexities apparent in the night sky complexities that modern science has only just begun to understand

Astronomy in the Origins of Religion Cometan,2020-09-15 Official title Do the prehistoric interactions between astronomy and religion form a distinct religious tradition In the dissertation for his Master s of Arts degree from the University of Central Lancashire Cometan introduced and thoroughly explored his theory of the existence of the oldest religious tradition based on astronomical observation which he titles the Astronic tradition or Astronicism In this work which received a Distinction Grade of 87 following its examination Cometan discovers that astronomy and religion were indeed intertwined in prehistoric and ancient times Through archaeological evidence Cometan makes the case for the existence of an Astronic religious tradition stretching back to the Upper Palaeolithic period of the Stone Age some 40 000 years ago Key ideas of Cometan s dissertation work include astromorphism astrolatry astroglyphs astromancy astronomical religion and the theory of an astronomical Urreligion an original or primordial religion **Awakening the Planetary Mind** Barbara Hand

Clow,2011-09-21 Completing our conscious evolution by releasing our collective fear of catastrophes Explains how we are on the cusp of an era of incredible creative growth Shows how we are about to overcome the collective fear caused by ancient catastrophes as we awaken to the memories of our lost prehistory Examines legendary cataclysms and scientific evidence of a highly advanced global culture that disappeared 11 500 years ago In this completely revised and expanded edition of

Catastrophobia bestselling author Barbara Hand Clow explains how we are on the cusp of an age of incredible creative growth made possible by restoring our lost prehistory Examining legendary cataclysms such as the fall of Atlantis and the biblical Flood and the mounting geological and archaeological evidence that many of these mythic catastrophes were actual events she reveals the existence of a highly advanced global maritime culture that disappeared amid great earth changes and rising seas 14 000 to 11 500 years ago nearly causing our species extinction and leaving humanity s collective psyche deeply scarred Tracing humanity s reemergence after these prehistoric catastrophes Clow explains how these events in the deep past influence our consciousness today Guided by Carl Johan Calleman s analysis of the Mayan Calendar she reveals that as the Earth s 26 000 year precessional cycle shifts our evolution is accelerating to prepare us for a new age of harmony and peace She explains how we are beginning a collective healing as ancient memories of prehistory awaken in our minds and release our unprocessed fear Passed from generation to generation this fear has been responsible for our constant expectations of apocalypse She shows that by remembering and moving beyond the trauma of our long lost past we bring the era of cataclysms to an end and cross the threshold into a time of extraordinary creative activity **Catastrophobia**

Barbara Hand Clow,2001-05-01 Bestselling author Barbara Hand Clow examines legendary cataclysms and shows how we are about to overcome the collective fear they have instilled in us The long awaited follow up that continues the revelations begun in The Pleiadian Agenda which has sold more than 60 000 copies Explains why contrary to many prophets of doom we are actually on the cusp of an era of incredible creative growth The recent discovery of the remains of ancient villages buried beneath the Black Sea is the latest instance of mounting evidence that many of the mythic catastrophes of history the fall of Atlantis the Biblical Flood were actual events In Catastrophobia Barbara Hand Clow shows that a series of cataclysmic disasters caused by a massive disturbance in the Earth s crust 11 500 years ago rocked the world and left humanity s collective psyche permanently scarred We are a wounded species and this unprocessed fear passed from generation to generation is responsible for our constant expectations of apocalypse from Y2K to the famed end of the Mayan calendar in 2012 Catastrophobia reveals the insidious global forces that have used these collective fears to control humanity for thousands of years But we are in the midst of a tremendous shift in the Earth s 26 000 year precessional cycle and there is every indication that the changes in consciousness over the last 30 years are the beginnings of a collective healing from these deep fears heralding a new age where we will see that the era of cataclysms is ending and a time of extraordinary creative activity is at hand **Exploring Archaeoastronomy** Liz Henty,2022-03-24 Archaeoastronomy and archaeology are

two distinct fields of study which examine the cultural aspect of societies but from different perspectives Archaeoastronomy seeks to discover how the impact of the skyscape is materialized in culture by alignments to celestial events or sky based symbolism yet by contrast archaeology s approach examines all aspects of culture but rarely considers the sky Despite this omission archaeology is the dominant discipline while archaeoastronomy is relegated to the sidelines The reasons for

archaeoastronomy's marginalized status may be found by assessing its history. For such an exploration to be useful, archaeoastronomy cannot just be investigated in a vacuum but must be contextualized by exploring other contemporaneous developments, particularly in archaeology. On the periphery of both, there are various strands of esoteric thought and pseudoscientific theories which paint an alternative view of monumental remains, and these also play a part in the background. The discipline of archaeology has had an unbroken lineage from the late 19th century to the present. On the other hand, archaeoastronomy has not been consistently titled, having adopted various different names such as alignment studies, orientation theory, astro-archaeology, megalithic science, archaeotopography, archaeoastronomy, and cultural astronomy names which depict variants of its methods and theory, sometimes in tandem with those of archaeology and sometimes in opposition. Similarly, its academic status has always been unclear. So to bring it closer to archaeology, there was a proposal in 2015 to integrate archaeoastronomy research with that of archaeology and call it *skyscape archaeology*. This volume will examine how all these different variants came about and consider archaeoastronomy's often troubled relationship with archaeology and its appropriation by esotericism to shed light on its position today.

Journal of Astronist Studies Volume 1 Issue 1 Cometan, Juan Vivanco, Michael York, Monica Gyimah, 2024-08-15. This marks the first issue of the *Journal of Astronist Studies* and begins what is hoped to be a long tradition of scholarly discourse on space religions and the broader intersection between astronomy, religion, and spirituality. This issue begins with a peer-reviewed article by myself that gives a short history and comparison between Astronism, Cosmism, and Cosmodeism. This first article of the first issue sets the scene for a scholarly discourse of Astronist studies by providing some insight into the legacy of Astronism's predecessors in Cosmism and Cosmodeism. This issue continues with an article by Juan Vivanco, who is new to the field of scholarly writing but who boasts a long history of entrepreneurship in eco-friendly construction and is based in Dubai. In his piece, Vivanco introduces readers to quantum cosmic theology and reflects on his experiences of cosmic meditation, which has close links with the Astronist practice of night sky exposition and meditation. The third article in this issue is another peer-reviewed piece from myself, this time focusing on the concept of astromorphism. This piece draws much inspiration from my master's dissertation but uniquely focuses on how the theory of an Astronic religious tradition contributes to the debate on the origins of religion. The origins of religion emerged as an academic pursuit in the early nineteenth century, but the role of prehistoric astrolatry was never given any prominence in the debate. The second half of the issue begins with a piece by Professor Emeritus of cultural astronomy and astrology, Michael York. York gives his perspective on how geocentrism represented by modern paganism and cosmocentrism represented by Astronism compare and contrast. York uses the sociological measuring tool of the ideal type to discuss the worldviews of geocentrism and cosmocentrism by analysing the aims of modern paganism and Astronism on whether humanity ought to escape Earth or attempt instead to restore our terrestrial conditions. The final full-length article in this issue comes from Dr. Monica Gyimah, who discusses issues

involving a lack of state recognition and legal personality specifically impacting people who profess indigenous beliefs Gyimah provides an extensive analysis of the international legal framework geared towards protecting indigenous communities and gives several examples of how indigenous groups professing various forms of nature religion and polytheism remain unrecognised and their access denied to several fundamental rights protected under freedom of religion or belief This issue ends with my review of Tsvi Bisk s latest work Cosmodeism A Worldview for the Space Age It was a pleasure to read and review Bisk s work as many of the topics Bisk discusses in his work are prominent in Astronist philosophy I reviewed Bisk s work from my perspective both as an Astronist but also as the founder of Astronism in particular to emphasise my belief in the need for the greater practical organisation of those movements that affirm the doctrine of transcension in some form

Herrstrom, 2017-09-26 This book is an interdisciplinary synthesis and interpretation about the experience of light as revealed in a wide range of art and literature from Paleolithic to Roman times Humanistic in spirit and in its handling of facts it marshals a substantial body of scholarship to develop an explication of light as a central even dramatic reality of human existence and experience in diverse cultural settings David S Herrstrom underscores our intimacy with light not only its constant presence in our life but its insinuating character Focusing on our encounters with light and ways of making sense of these this book is concerned with the personal and cultural impact of light exploring our resistance to and acceptance of light Its approach is unique The book's true subject is the individual's relationship with light rather than the investigation of light's essential nature It tells the story of light seducing individuals down through the ages Consequently it is not concerned with the progress of scientific inquiries into the physical properties and behavior of light optical science but rather with subjective reactions to it as reflected in art Paleolithic through Roman architecture Egyptian Grecian Roman mythology and religion Paleolithic Egyptian and literature e.g. Akhenaten Plato Aeschylus Lucretius John the Evangelist Plotinus and Augustine This book celebrates the complexity of our relation to light's character No individual experience of light is truer than any other none improves on any previous experience of light's tidal pull on us And the wondrous variety of these encounters has yielded a richly layered tapestry of human experience By its broad scope and interdisciplinary approach this pioneering book is without precedent
