Stones and Bones Carl Wieland, 2001 *Deception by Design* Lenny Flank, 2007 A history of the anti evolution Intelligent Design movement in the US from the Scopes trial in 1925 through the rise of creation science in the 1980 s to the rise of intelligent design theory in the 1990 s Appendix includes the Wedge Document a leaked internal planning paper which spells out the theocratic political goals of the Intelligent Design movement *Fire-Breathing Dinosaurs? The Hilarious History of Creationist Pseudoscience at Its Silliest* Philip J. Senter, 2019-03-14 A dinosaur book like no other this irreverent chronicle of science and pseudoscience takes the reader on a journey through numerous bizarre ideas about ancient reptiles Were dragon legends inspired by human encounters with fire breathing dinosaurs Do the Bible and other ancient works of literature and art depict dinosaurs Astoundingly those and other strange notions have infiltrated grade school science textbooks This exposé unmasks the errors that underlie such notions and reveals the science that flattens them while treating readers to explanations of rocket fuel nuclear power plants the electric eel s shocking capabilities and how the young Earth creationist position contradicts the very scripture that it strives to uphold Finding humor in absurdity the book shows fans of science religious studies folklore and fire that young Earth creationist dinosaur pseudoscience is deeply comic once one gets to know it properly Answers to the 4 Big Questions , 2000 From Flood to Fallen Kingdoms Jarno Moilanen, 2025-05-13 From Flood to Fallen Kingdoms FFFK is the first truly authoritative detailed and coherent young earth creationist overview of the post flood history of the ancient Near East and the land of Israel for laypersons and scholars alike It is a unique work which does not have serious rivals in the biblical creationist book market The lack of a good and comprehensive introductory book was the main reason why I started to write the book in the first place I have made use of the best available scholarly literature Christian as well as secular The book contains a lot of my own research but it is also in very good agreement with the archaeological articles written by A J M Osgood can be read at creation com and the books of David Down Unwrapping the Pharaohs and Unveiling the Kings of Israel for example FFFK follows the absolute chronology of Floyd Nolen Jones The Chronology of the Old Testament As a Bible faithful narrative introduction to the history and archaeology of the ancient Near East From Flood to Fallen Kingdoms is far better than the existing apologetic works that come towards the genre of FFFK Evidence for the Bible by Clive Anderson and Brian Edwards Ancient Post Flood History by Ken Johnson The World s Story 1 The Ancients by Angela O Dell for example From Flood to Fallen Kingdoms will strengthen the faith of numerous believing readers who take the Holy Scriptures seriously They will also be surprised to see how well the first five post flood centuries from Ararat to Abraham which until now have been in great darkness can be elucidated through proper interpretation of biblical and archaeological evidence **God Is!** A. Arthur Pinno, 2011 GOD IS why evolution isn t demonstrates how the nature character of GOD is the death knell to the modern mythology of evolution as it is to all human mythologies There is much confusion among Christians and the general public regarding creation and evolution and what each implies about the

nature of GOD This book by A Arthur Pinno seeks to bring Biblical clarity to many of the questions that people have in this area Does the universe testify to the glory of GOD Is GOD s signature found in every cell GOD vs Nothing Where do you think everything came from Are humans mutated apes How does dinosaur blood reveal a young earth How does the relativity of time impact the age of the universe Is evolution a massive worldwide conspiracy of scientists Is theistic evolution a bridge between Christianity and science What are the basic assumptions of evolution What are the fruits of the evolutionary tree Were Adam and Eve real people What did JESUS believe about creation and the flood Who is GOD and how can anyone actually know Him Could a GOD of love create hell A Arthur Pinno is the director of Ends of the Earth Courier for CHRIST a ministry dedicated to sharing the grace and truth of CHRIST in word and deed in Canada Russia India Burundi and other ends of the earth where GOD leads He has been a pastor for over twenty five years serving in both Canada and the United States For the past six years he has also served as president of the Association of Free Lutheran Congregations Canada He and his wife Dorothy have been blessed with four children and presently live in Vernon British Columbia Canada

Evolution of the Human Diet Peter S. Ungar, 2007 We are interested in the evolution of hominin diets for several reasons One is the fundamental concern over our present day eating habits and the consequences of our societal choices such as obesity prevalent in some cultures and starvation in others Another is that humans have learned to feed themselves in extremely varied environments and these adaptations which are fundamentally different from those of our closest biological relatives have to have had historical roots of varying depth The third and the reason why most paleoanthropologists are interested in this question is that a species trophic level and feeding adaptations can have a strong effect on body size locomotion life history strategies geographic range habitat choice and social behavior Diet is key to understanding the ecology and evolution of our distant ancestors and their kin the early hominins A study of the range of foods eaten by our progenitors underscores just how unhealthy many of our diets are today This volume brings together authorities from disparate fields to offer new insights into the diets of our ancestors Paleontologists archaeologists primatologists nutritionists and other researchers all contribute pieces to the puzzle This volume has at its core four main sections Reconstructed diets based on hominin fossils tooth size shape structure wear and chemistry mandibular biomechanics Archaeological evidence of subsistence stone tools and modified bones Models of early hominin diets based on the diets of living primates both human and non human paleoecology and energetics Nutritional analyses and their implications for evolutionary medicine New techniques for gleaning information from fossil teeth bones and stone tools new theories stemming from studies of paleoecology and new models coming from analogy with modern humans and other primates all contribute to our understanding When these approaches are brought together they offer an impressive glimpse into the lives of our distant ancestors The contributions in this volume explore the frontiers of our knowledge in each of these disciplines as they address the knowns the unknowns and the unknowables of the evolution of hominin diets
