drains basins and astronomical alignments The archaeological community has largely dismissed this seemingly eclectic collection of structures as the work of an eccentric farmer named Jonathan Pattee who built his house on top of the ruins in the 19th century Other researchers have sought to compare the chambers and astronomical alignments to stone structures from around the world built by other ancient peoples No one has thought to evaluate the site on its own merits specifically evaluating its architecture Architecture can tell you a lot about a culture Using this approach the author unravels the mystery surrounding the site This architectural study revealed the site was built in a series of distinct phases each with its own unique style while at the same time incorporating key concepts and ideas from previous phases There is a clear evolution of building skills and cultural ideas that can be followed through the architectural build out of the site Because key features and ideas were carried forward from one phase to the next we now know that the site was the work of a single culture over a several thousand year period Stone tools and pottery recovered from archaeological excavations at the site confirm that the builders were Native Americans The idea of Native Americans building stone structures for ceremonial and spiritual purposes has gained a lot of credibility over the past twenty five years There is mounting evidence that hundreds of ceremonial stone landscapes CSL with stone cairns niches enclosures standing stones chambers and astronomical alignments found throughout northeastern United States are part of a broad based Native American cultural tradition The America s Stonehenge site is one of the most sophisticated and culturally complex of these sacred ceremonial places The second part of this book uses primary source materials like deeds town records court cases and genealogy to reconstruct the history of the Pattee family who owned the hill where the site is found from 1739 through 1863 The Patees started out in the 1700s as a prosperous family with a house in North Salem village and a 248 acre farm By the 1820s the third generation was reduced to owning 15 acres of the original farm and living in a small house built on top of the ruins of the site Despite his many financial misfortunes Jonathan Pattee third generation managed to hold on to and protect the site

America's Stonehenge Deciphered Mary E. Gage, 2006 For the ancient Native Peoples the place known to us as America s Stonehenge Mystery Hill was a sacred place For 2500 years they came annually to hold ceremonies with the spirits At first they came on the summer solstice and then later they came for the winter solstice and spring equinox They built ritual structures like stone chambers cairns drains basins enclosures and standing stones as part of their ceremonial areas As the ceremonies were altered and added to new ceremonial structures were built to accommodate them These structures were constructed for specific purposes contained symbolism meaningful to their culture and had distinct architectural styles The result is an amazing archaeological record of the 2500 year cultural history of this sacred place Americai s Stonehenge Deciphered explores the purpose of these structures the ceremonies held at them and the meaning behind the symbolism built into them It traces how these cultural beliefs were passed from generation to generation and how they were added to and altered to meet the changing needs of their culture What emerges from this is a profound respect for the intelligence sophistication and

the depth of their spiritual worldview culture and their expertise with building stone structures **A Boy's Summer** Gerry Spence, 2025-08-22 Gerry Spence father to six grandfather to ten is a man who knows intimately the joys of fatherhood and who writes beautifully and lyrically about how fatherhood allows a man to rediscover the boy within himself while simultaneously assuming true adult responsibility for the first time This is a man who truly understands boys and how boys grow up to become men No school teaches us how to become successful human beings there are no classes to teach boys how to become decent adult men Boys grow up by imitating their father if that is the father spends enough time with his son A Boy's Summer is a book of short essays describing activities adventures and experiments that fathers and sons can do together These projects take from an hour to an afternoon to a weekend time that a father and son can spend together discovering themselves and the world around them Illustrated with forty five line drawings by Tom Spence A Boy's Summer is written so it can be read by father to son or by son to father This book is for boys who with their fathers will share those precious moments that create the stuff of a lifetime from which successful sons and because of it successful fathers are made
