## **Stop The Clock:**

*Stop the Clocks!* Helen Powell, 2012-03-30 The clock plays a significant part in our understanding of temporality but while it simplifies regulates and coordinates it fails to reflect and communicate the more experiential dimensions of time As Helen Powell demonstrates in this book cinema has been addressing this issue since its inception *Stop the Clocks* examines filmmakers relationship to time and its visual manipulation and representation from the birth of the medium to the digital present It engages both with experimentation in narrative construction and with films that take time as their subject matter such as *Donnie Darko* *Interview with a Vampire* *Lost Highway* and *Pulp Fiction* Helen Powell asks what underpins the enduring appeal of the science fiction genre with filmmakers and audience and how cinematography might inform our conceptualisation of other imagined temporal worlds including the afterlife She examines the role of angels and vampires in contemporary cinema as well as the distinctive time schemes of new media and their implications for rethinking time and the moving image through digitalisation Broad based and accessible *Stop the Clocks* will appeal to a wide interdisciplinary audience and provides a useful sourcebook on undergraduate and postgraduate courses in film and other arts and media based disciplines

Smith,2000-11-09 Mastered by the Clock is the first work to explore the evolution of clock based time consciousness in the American South Challenging traditional assumptions about the plantation economy s reliance on a premodern nature based conception of time Mark M Smith shows how and why southerners particularly masters and their slaves came to view the clock as a legitimate arbiter of time Drawing on an extraordinary range of eighteenth and nineteenth century archival sources Smith demonstrates that white southern slaveholders began to incorporate this new sense of time in the 1830s Influenced by colonial merchants fascination with time thrift by a long held familiarity with urban public time by the transport and market revolution in the South and by their own qualified embrace of modernity slaveowners began to purchase timepieces in growing numbers adopting a clock based conception of time and attempting in turn to instill a similar consciousness in their slaves But forbidden to own watches themselves slaves did not internalize this idea to the same degree as their masters and slaveholders found themselves dependent as much on the whip as on the clock when enforcing slaves obedience to time Ironically Smith shows freedom largely consolidated the dependence of masters as well as freedpeople on the clock      **On**
