

# Do's and Don'ts of HAIRLOSS PREVENTION

## DO's

### Check for signs of hairloss

Look for changes in density, volume, how wide your part is, and how visible your scalp is.

### Manage your stress

Stress disrupts your hair's natural growth cycle, which may cause hairloss. Engage in calming activities like meditation or yoga when you are stressed out.

### Brush your hair gently

Apply full strokes from the scalp to the tips of your hair to distribute the hair's natural oil.

### Get lots of Vitamin E

Vitamin E from nuts, seeds, and green vegetables can help strengthen hair and encourage hair growth.

### Use your hair products sparingly

Hair experts warn against the improper use of hair sprays, gels, and relaxers. Use these products less often for less damage.

### Seek professional help when you notice changes in your hair

Hair experts can identify hair problems and recommend the right hair treatment to address your needs.

## DONT's

### Smoke

Cigarette smoke contains thousands of harmful chemicals that affect the body, including the hair.

### Drink heavily

Binge drinking dehydrates the body, depriving the scalp of essential nutrients needed for hair growth.

### Overdo chemical treatments

Cigarette smoke contains thousands of harmful chemicals that affect the body, including the hair.

### Overuse heat tools

If you have to use hair irons or curlers, make sure not to go over the same section of hair so many times, otherwise you get bad breakage.

### Rub or pull on wet hair

Wet hair tends to break more easily, so avoid rubbing and combing hair when it's wet.

was done only once every eight days with a rinse made up of egg yolks beaten in warm water and rubbed over the hair This was then washed with lukewarm water to make the hair shiny But what about the scalp you may ask They did not bother much about cleaning the scalp as long as the hair was squeaky clean And then when they suffered from dandruff and others scalp related diseases they cleaned the scalp with orris root powder applied at night and then brushed out the next morning They also used pomades and even some unguents made up of bear grease phew what a pong But then I guess when everybody in the vicinity is smelling of bear grease the nose gets accustomed to it Nevertheless for our amusement here is the famous Mrs Beeton s recipe for pomade published in 1861 Here you did not use the fat taken from a poor unfortunate brown bear Russian for choice I am not joking What fools these vain mortals be Anyway this pomade was made by pound of lard equally pong making to our oh so sensitive 21st century noses scent of choice and two Penny worths of castor oil The lard was unsalted It was beaten up the castor oil was added to it during the beating process with the help of a kitchen knife and few drops of your preferred scent This pomade was then put into porcelain or glass pots and then covered well so that it did not turn rancid
