The Historical Novel, Transnationalism, and the Postmodern Era Susan Brantly,2017-02-17 This volume explores the genre of the historical novel and the variety of ways in which writers choose to represent the past How does an author s nationality or gender impact their artistic choices To what extent can historical novels appeal to a transnational audience This study demonstrates how histories can communicate across national borders often by invoking or deconstructing the very notion of nationhood Furthermore it traces how the concerns of the postmodern era such as postmodern critiques of historiography colonialism identity and the Enlightenment have impacted the genre of the historical novel and shows this impact has not been uniform throughout Western culture Not all historical novels written during the postmodern era are postmodern The historical novel as a genre occupies a problematic yet significant space in Cold War literary currents torn between claims of authenticity and the impossibility of accessing the past Historical novels from England America Germany and France are compared and contrasted with historical novels from Sweden testing a variety of theoretical perspectives in the process This pitting of a center against a periphery serves to highlight traits that historical novels from the West have in common but also how they differ The historical novel is not just a local regional phenomenon but has become during the postmodern era a transnational tool for exploring how we should think of nations

and nationalism and what a society should or should not look like

which plays a fundamental role in evaluating hypotheses Chapters 8–10 address the evaluation of universal existential and statistical hypotheses Chapter 11 concerns quality assurance and introduces the concepts of validity and reliability. Next in chapters 12 and 13 we address publishing with an emphasis on the specifics of technology science. Eventually the last chapter chapter 14 briefly introduces the philosophy of science. The book systematically collects in the form of suggestions recommendations and guidelines the author's 35 year experience as a researcher, author and reviewer in technology science. It is written for anyone working in technology science from master's students to researchers and supervisors.
