Critical Management Research in Eastern Europe M. Kelemen,M. Kostera,2002-10-23 The process of transition in Eastern European countries is one in which ideas of the past and present both local and Western meet and conflict Presenting a wealth of new ethnographic and interview based research Critical

Management Research in Eastern Europe argues that the reform process in Central and Eastern Europe has been dominated by the traditional Western view of management practice. However, this approach overlooks the fact that certain managerial and organizational practices developed in Central and Eastern Europe may still be appropriate and indeed effective within this particular setting. The book brings together authors from both East and West Europe to evaluate how the two systems can best be harmonized, which is particularly important in the context of EU enlargement.

Challenges and Controversies in Management Research Bill Lee, Catherine Cassell, 2011-01-25. Challenges and Controversies in Management Research explores the history and cultural context, current issues and controversies, and potential development of research in the field of management. The collection of essays is written by scholars of international standing, and the chapters address the development of management research in one or another continent, the need for global collaboration, the current state of management research, and the development of the business school setting in which that research takes place. Factors affecting management research are explored in detail, giving consideration to the relationship between teaching, ethical conduct, publication quality, audits, collegiality, and research. Contributions in the book also explore the development and usefulness of theories in management research and consider the relevance of management research and its applicability for management practice, policy makers, and the voluntary sector. A final section of contributions explores the future challenges for management research, including the realization of reflexivity, the enduring gender bias of the management field, the future of theory, the patterns of development of new areas of management research, and the need to manage large databases.

The Globalization Of Strategy Research Joel Baum, Joseph Lampel, 2010-07-02. This volume brings together various emerging perspectives in strategy research for further interaction and debate. Contributions address a range of issues related to the globalization of strategy research, and chapters examine strategy theory, methods, and research, as well as strategy as practice, discourse, and reflexive design.

Effective Risk Communication Joseph Arvai, Louie Rivers III, 2013-10-30. There are two questions often asked of risk communication: what has been learned from past work, and what is needed to push the field forward? Drawing on the experience of leading risk researchers and practitioners, Effective Risk Communication focuses on answering these questions. The book draws together new examples of research and practice from contexts as diverse as energy generation, human health, nuclear waste, climate change, food choice, and social media. This book treats risk communication as much more than the interchange of risk information between experts and non-experts; rather, it aims to emphasise the diversity in viewpoints and practices. In each specially commissioned chapter, the authors reflect on the theoretical and applied underpinnings of their best projects and comment on how their approach could be used effectively by others. Building upon each other, the chapters will provoke new discussion and action around a discipline which many feel is neither meeting important needs in practice nor living up to its potential in research. Through a more careful examination of the work already done in risk communication, the book will help develop better, more reflective practice for the future.

Amplifying Management Research for the Common Good Robert H. Tiell, S. Charles Malka, 2024-03-01 How can management research promote a more applicable and a more transparent knowledge for the benefit of individuals and organizations? Looming large over this question is the challenge of repurposing management research for improving public good. Co-edited by R. H. Tiell and S. C. Malka, the title of the book says it all: Amplifying management research for the common good. Lessons for curious individuals and organizations. Insights from practitioners in the field. In this book, we sought to bridge the chasm that separates the non-academic audience from the typically less accessible scientific journals. We attempted to make empirical evidence more inclusive, impactful, and public good relevant for the non-academic stakeholders that live and work in the broader community. For that purpose, we made available to the reader and to our chapter contributors a collection of published papers, some authored by the editors of this book and others co-authored with other researchers. The papers cover a diverse set of business topics, all of which we believe hold much relevance for management today. Providing the reader with their insights on subject matter along with lessons and practical recommendations, we sought experts in the field that can build on empirical research in various areas of management and then synthesize and broaden it through their expertise and work experience. As a trigger, we aligned each contributor with one or two empirical papers based on their background, interests, and professional experience. Using the assigned papers as a springboard, we asked each author to identify emerging themes around which they can build their chapter. We wanted them to think of the book audience: non-academicians comprised of interested and curious individuals, managers, and their organizations. And we wanted our authors to elaborate on practical lessons, suggestions, and recommendations that can make a difference in the lives of the book audience. Our effort resulted in a collection of chapters covering a wide range of topics, from supply chain challenges in Central America to life-changing long-term effects of the pandemic from delivery of services.

for mental health and suicide to logistics capabilities pre post Ivan in the Cayman Islands from the new workplace to labor market shortages and from new workforce service pathways and the optimization of talent to the impact of recent recessions on the youth and the unemployed and the assessment of C suit level leaders We would like to believe that the breadth of the topics covered and the amount of information being disseminated through the book chapters are meaningful practical and relevant to a wide audience of curious readers

Factors Affecting the Adoption of the Balanced Scorecard by Small and Medium Sized Enterprises Dieu Thuong Ha,Thanh Le,Greg Fisher,2024-02-09 Since its introduction by Kaplan and Norton in 1992 the Balanced Scorecard BSC has gradually been adopted as a fundamental system of management by many organisations Because the BSC is mainly designed for large

companies in developed countries there is a question of its successful application in Small and Medium sized Enterprises SMEs especially those in developing countries As there is little research in this area this book is designed to fill that gap In this book Vietnamese SMEs are used as the central study cases for the application of BSC Such a system enables SMEs to meet their management needs more quickly Lessons learned in this study can be extended not only to other Vietnamese SMEs but also to firms in other countries with similar economic conditions The book will also provide an improved understanding on factors influencing the adopting process
