The Tides of Mind: Uncovering the Spectrum of Consciousness
David Gelernter,2016-02-22 A rock star New York Times of the computing world provides a radical new work on the meaning of human consciousness The holy grail of psychologists and scientists for nearly a century has been to understand and replicate both human thought and the human mind In fact it s what attracted the now legendary computer scientist and AI authority David Gelernter to the discipline in the first place As a student and young researcher in the 1980s Gelernter hoped to build a program with a dial marked focus At maximum focus the program would think rationally formally reasonably As the dial was turned down and focus diminished its mind would start to wander and as you dialed even lower this artificial mind would start to free associate eventually ignoring the user completely as it cruised off into the mental adventures we know as sleep While the program was a only a partial success it laid the foundation for *The Tides of Mind* a groundbreaking new exploration of the human psyche that shows us how the very purpose of the mind changes throughout the day Indeed as Gelernter explains when we are at our most alert when reasoning and creating new memories is our main mental business the mind is a computer like machine that keeps emotion on a short leash and attention on our surroundings As we gradually tire however and descend the mental spectrum reasoning comes unglued Memory ranges more freely the mind wanders and daydreams grow more insistent Self awareness fades reflection blinks out and at last we are completely immersed in our own minds With far reaching implications Gelernter s landmark *Spectrum of Consciousness* finally helps decode some of the most mysterious wonders of the human mind such as the numinous light of early childhood why dreams are so often predictive and why sadism and masochism underpin some of our greatest artistic achievements It s a theory that also challenges the very

notion of the mind as a machine and not through empirical studies or hard science but by listening to our great poets and novelists who have proven themselves as humanity's most trusted guides to the subjective mind and inner self. In the great introspective tradition of Wilhelm Wundt and René Descartes, David Gelernter promises to not only revolutionize our understanding of what it means to be human but also to help answer many of our most fundamental questions about the origins of creativity, thought, and consciousness.

Memories from Cherry Harvest Amy Wachspress, 2012-06-19

Three generations of women struggle with oppression in this prize-winning historical saga from a natural-born storyteller, Julia Alvarez. When I remember Russia, I ache with longing for the village of my birth where the beloved grandparents magically produced candy in a handshake and told stories of long ago when God spoke to humans and enchantments filled the world. Two Jewish sisters born in Russia shortly before the Communist Revolution are forced to flee the pogroms and persecution and travel with their parents to British-occupied Palestine. The girls' parents befriend a widower with two children and join forces, creating a blended family. When the girls are teenagers, World War II tears the family apart, sending the girls separately to France and America. Their lives unfold in tandem; babies are born, friendships forged, and cherry pies baked despite the brutal backdrop of the Holocaust. As the family grows into the next generation, one of the daughters, an artist drawn to a bohemian lifestyle, surrounds herself with a multicultural circle of friends, the likes of which her ancestors could not have imagined. Subsequently, the artist turns her passion to providing aid to Salvadoran refugees fleeing the death squads in their homeland, just as her own grandmother once fled the pogroms of Russia. As she follows her vocation of reversing the damage that torturers inflict on their victims, she must also overcome a past-life trauma that haunts her very core. A winner of the Fabry Literary Prize, *Memories from Cherry Harvest* spans seventy years and five continents, explores the physics of memory, and shows how the tenacity of good can ultimately withstand and overcome the memory of tragedy. Like Julia Alvarez's *In the Time of the Butterflies* and Doris Lessing's *Martha Quest*, novels this story about fighting the injustices of the 20th century will engage readers of politically charged fiction. **Library Journal**

Children Writing Stories

Armstrong, Michael, 2006-03-01

Here is a worthy successor to Ted Hughes' *Poetry in the Making*, the book that enabled me to gain the confidence to begin to find my own voice as a storyteller. *Children Writing Stories* confirms that we all have a story to tell if we are enabled to develop enough self-belief. So much of our natural creativity is smothered during our school years. Teachers and children feel hemmed in by the strictures of a curriculum which simply does not allow room for creativity to breathe. Unlock the chains, let the light in, and this is the kind of writing that will flow. This is the kind of intellectual and emotional growing that can transform young lives. Michael Morpurgo, Children's Laureate 2003-2005. What a splendid book. Michael Armstrong pays attention, thirty years of it, to the stories that children write. We get two for one: the children's own delightful and intriguing work, and I want to rush off and write some Wally, age 5, stories of my own. Michael Armstrong's intense interpretations. Allan Ahlberg. This is real learning at its best, teaching by example through painstaking scrutiny of the

art of young writers Absorbing moving enlightening inspiring Morag Styles University of Cambridge In Children Writing Stories Michael Armstrong reveals the creative force of children's narrative imagination and shows how this develops through childhood He provides a new and powerful understanding of the significance of narrative for children's intellectual growth and for learning and teaching The book explores a series of real stories written by children between the ages of five and fifteen and traces the growth of literary consciousness from the dawn of written narrative in the kindergarten through the early years of schooling and on into adolescence Each chapter opens with a story or stories which the author then goes on to examine in detail so that the book may be seen as both a select anthology of children's stories and as a critical account of children's narrative practice This original and provocative book will appeal to teachers parents students of education and readers with an interest in literacy children's writing or narrative theory Telling God's Stories with Power Paul F.

Koehler, 2010-06-01 Biblical Storytelling in Oral Cultures This is a complete and practical introduction to storytelling especially for people who want to learn about using biblical storytelling in cross cultural contexts and who want to train others to become storytellers It includes many fascinating accounts of the responses of tribal people to the first proclamation of the gospel through storytelling The result of years of research and field testing Telling God's Stories with Power is a product of the author's own journey as he confronted the challenges of teaching the Bible in parts of the world where people are unaccustomed to a Western style of learning Full of innovative and groundbreaking insights this study is packed with ideas explanations and constructive suggestions stated in clear and simple language Throughout the book there are extensive examples from the storytellers own experiences Tracing the movement of the biblical stories across multiple generations of tellers and listeners storytelling is found to be superior for knowledge transfer and for bypassing resistance to the gospel in oral contexts thus presenting clear evidence of the effectiveness of biblical narrative among oral learners **Front Line**
