### **Refining Expertise** Gwen Ottinger,2013-03-04 Winner of the 2015

Rachel Carson Prize presented by the Society for Social Studies of Science Residents of a small Louisiana town were sure that the oil refinery next door was making them sick As part of a campaign demanding relocation away from the refinery they collected scientific data to prove it Their campaign ended with a settlement agreement that addressed many of their grievances but not concerns about their health Yet instead of continuing to collect data residents began to let refinery

scientists assertions that their operations did not harm them stand without challenge What makes a community move so suddenly from actively challenging to apparently accepting experts authority Refining Expertise argues that the answer lies in the way that refinery scientists and engineers defined themselves as experts Rather than claiming to be infallible they began to portray themselves as responsible committed to operating safely and to contributing to the well being of the community The volume shows that by grounding their claims to responsibility in influential ideas from the larger culture about what makes good citizens nice communities and moral companies refinery scientists made it much harder for residents to challenge their expertise and thus re established their authority over scientific questions related to the refinery s health and environmental effects Gwen Ottinger here shows how industrial facilities current approaches to dealing with concerned communities approaches which leave much room for negotiation while shielding industry s environmental and health claims from critique effectively undermine not only individual grassroots campaigns but also environmental justice activism and far reaching efforts to democratize science This work drives home the need for both activists and politically engaged scholars to reconfigure their own activities in response in order to advance community health and robust scientific knowledge about it

**The Kitchen Spoon's Handle** Michele Ruth Gamburd,2000 A common Sinhala proverb states A woman s understanding reaches only the length of the kitchen spoon s handle In this beautifully written book on the effects of female migration from Sri Lanka Michele Ruth Gamburd shows that the length of that handle now spans several thousand miles rather than a mere twelve inches During the past twenty years a great many Sri Lankan women have left their homes and families to work as housemaids in the wealthy oil producing states of the Middle East Gamburd explores global and local as well as personal reasons why so many women leave to work so far away Focusing primarily on the home community rather than on the experiences of the workers abroad she vividly illustrates the impact of the migration on those left behind and on the migrants who return As migrant women take on the formerly masculine role of breadwinner Gamburd explains traditional concepts of the value of women s work are significantly altered She examines the effects of female migration on caste hierarchies class relations gender roles and family interactions The Kitchen Spoon s Handle skillfully blends the stories and memories of returned migrants and their families and neighbors with interviews with government officials recruiting agents and moneylenders The book provides a rich and sensitive portrait of the confluence of global and local processes in the lives of the villagers Gamburd presents a sophisticated yet very readable discussion of current theories of power agency and identity

*Lessons from My Mother's Kitchen* Ranjini Rao,2020-10-20 When I lost my mother to a long and painful battle with cancer four years ago I was thousands of miles away alone and thick with grief At first everything seemed distant and pale and I went through my days like a robot lead footed and sandy eyed trying to make sense of each moment It took a while but I came to understand that the only way out was through At some point I submitted to the dagger of sorrow as it carved out a hollow in my heart turning me into some sort of an unself conscious sculpted form I relived all the memories of my mother and gleaned new lessons from them Through the eighteen essays in this book I recount how her food music and stories all the things that she birthed in her spacious sun dappled kitchen helped me cope with long distance grief and taught me to look at life with renewed hope I also present some special recipes straight from Amma's kitchen and a bunch of kitchen poems in her honour finding her in such things as the sizzling of spices the bubbling of flavourful broths or a melodious Raga swirled into my cup of coffee My wish is that this book will come to stand for all this and more a celebration of life and a quiet acceptance of death I hope that it will inspire and touch many those who are going through rough times or those who are simply living the ordinary life for often we forget that there's so much magic in it
