of the first three volumes of Oxford University Press's new Pocket Guide natural history series. The series fills the need for field guides for those who want to find out about the common organisms they come across during countryside excursions without having the specialist knowledge required to make detailed species identifications. All the books in the series are attractively designed and lavishly illustrated with high quality colour photographs and line drawings throughout. *Animal Tracks and Signs* is the only book in print that allows the reader to identify over 200 North west European mammals and birds that have passed by from the evidence they have left behind. Whether one finds footprints, feeding damage, a skull or a hole in the ground, this book will describe how it was made and who by. A pleasure to dip into, it is also an essential tool for anyone who needs to identify remains, whether they are professional ecologists or schoolchildren collecting items for a nature table.

**The Storks' Nest** Laura Lynne Williams, 2016-12-21. A memoir of love and nature in the Russian countryside.  
*Armand Gatti* Armand Gatti, 2000-02-01. A French national born in 1924 of immigrant Italian parents, Armand Gatti worked as a special correspondent in post-war Europe, Siberia, Korea, China, and Latin America. He abandoned journalism in the 1950s to write for the theater. A visionary more than an ideologue, a utopian anarchist more than a partisan, Gatti engages with the themes and experiences that shape the 20th century as we know it: destruction on a global scale, injustice and oppression, displacement and survival, identity and language. His writing challenges theatrical and cultural conventions, inviting us to reassess both the world we live in and the forms we use to represent it.  
**Himalayan Biodiversity in the Changing World** Pavel Kindlmann, 2011-09-18. This book presents some results on selected taxa in the Himalayan region, mainly Nepal, pinpoints the threats to their survival and suggests ways how to avoid their extinction. Most chapters are based on graduate research projects, relatively long-term field studies. The data presented here can be a good source of updated information on the subject and will prove to be a very useful reference in future studies of Himalayan biodiversity. They also tend to pinpoint the existing gaps in our knowledge of this region. All the chapters are based on recent trends of biodiversity and conservation vision, so the book can be a potential alternative to the existing, relatively older books with outdated vision and information. Its main goal, however, is to disseminate the information about biodiversity conservation problems in the Himalayan region among the people in the developed world.

**Storks, Ibises and Spoonbills of the World** James Hancock, James A. Kushlan, M. Philip Kahl, 2010-09-30. Everything you ever wanted to know about storks, ibises, and spoonbills. Some of the world's largest and most spectacular birds are to be found among this group of wading birds. Tragically, they also include many of the world's most endangered species, as changes in land use erode their wetland habitats. Some, like the White Stork, have lived alongside humans for hundreds of years and are well known from numerous studies. Others, like the Storm's stork and ibises of West Africa, South East Asia, and South America, live so secluded a life in the remote corners of the globe that they will probably be extinct before even the most basic details of their biology are known. In this monograph, three authors and two artists have combined their skills to

capture what is known of this group of wading birds The text opens with general chapters on taxonomy and feeding breeding and behaviour followed by detailed coverage of each species      Shutdown of the River Water System at the Savannah River Site, City of Aiken, SC ,1996      *Beat about the Bush* Trevor Carnaby,2008 Revealing fascinating insights into the mysterious lives of birds native to the mother continent this remarkable guide exhibits the many vibrantly colorful species found in the South African bush Providing an in depth discourse on all aspects of bird life detailing their myriad forms survival strategies in a harsh landscape breeding and feeding behaviors movements migrations preferred habitat unique behavioral patterns and vocalizations this comprehensive manual also expertly advises on how to easily and accurately identify each individual species Populated with more than 900 brilliantly vivid photographs and exhaustively researched to fill the gap in existing literature and field guides this essential reference will delight nature lovers tourists birdwatchers and bush lovers alike
