Storm Warning Gambling With The Climate Of Our Planet:

Storm Warning Lydia Dotto, 2000 The Ice Storm of 1998 The flooding of Manitoba of 1997 Wherever you live it's likely you've experienced some extreme weather lately A recent report from the Red Cross stated that natural catastrophes in 1998 has wreaked the most havoc on record and warned that a series of super disasters could be imminent What's behind all this stormy weather In *Storm Warning* science writer Lydia Dotto shows there's strong evidence our climate is changing due to human interference and that the events of recent years are just a dress rehearsal for dramatic changes in the earth's climate Climate conferences like those held in Rio in 1992 and Kyoto in 1997 were supposed to set the world on a course for change Instead they have led to political squabbles watered down resolutions and a disturbing failure to reduce the greenhouse gas emissions that have been targeted as the main culprit in creating the global warming trend *Storm Warning* illustrates the dire consequences of delay and inaction on both the personal and political fronts In the climate change game the stakes are disturbingly high with the very future of life on our planet at risk

The Last Polar Bear Steven Kazlowski, Theodore Roosevelt, 2008 Scientists agree that by the end of this century the polar bear will be the first mammal threatened with extinction due to climate change *The Last Polar Bear* is the first book to fully document that story The continued survival of these magnificent white bears in their warming and melting Arctic world is uncertain yet their fate is also a wake up call compelling us to act now to stem global warming Through Steven Kazlowski's unparalleled imagery the most critical environmental issue of our time is brought to life *The Last Polar Bear* places the reality of climate change in our hands We see the plight of the polar bear an animal already feeling the detrimental effects of our reliance on fossil fuels as its icy habitat melts Over the course of the last six years wildlife photographer Steven Kazlowski has photographed the polar bear in its wild habitat from Hershel Island in Canada to Point Hope in Alaska *The Last Polar Bear* pairs his intimate images with anecdotes about his Arctic adventures as well as authoritative essays about the polar bear in the context of climate change Alaska based writers Richard Nelson Charles Wohlforth Nick Jans and leading USGS polar bear biologist Steven C Amstrup draw on decades of experience in the Arctic to cover the biological cultural and anthropological aspects of climate change Dan Glick long time correspondent for Newsweek addresses the history of climate change while Frances Beinecke president of the Natural Resources Defence Council and Theodore Roosevelt IV offer perspectives on activism and politics

[Climate, Culture, Change](#) Timothy B. Leduc, 2011-02-21 Every day brings new headlines about climate change as politicians debate how to respond scientists offer new data and skeptics critique the validity of the research To step outside these scientific and political debates Timothy Leduc engages with various Inuit understandings of northern climate change What he learns is that today's climate changes are not only affecting our environments but also our cultures By focusing on the changes currently occurring in the north he highlights the challenges being posed to Western climate research Canadian politics and traditional Inuit knowledge *Climate Culture Change* sheds light on the cultural challenges posed by northern warming and proposes an

intercultural response that is demonstrated by the blending of Inuit and Western perspectives **In the Chamber of Risks** William Leiss, 2001 Leiss shows that both risk management and risk communication when properly constructed require an elaborate process because the very things that can cause harm are in most cases the same things that bring us great benefits such as paper mills electricity from nuclear power generating stations or wireless telecommunications Mitigation of Natural Hazards and Disasters C. Emdad Haque, 2006-02-23 For these and other reasons the findings reported in this volume will be of large significance as future policy decisions are made in a wide variety of natural and social environments GILBERT F WHITE Professor Emeritus Geography and Institute of Behavioral Science University of Colorado Colorado USA 2 C Mitigation and Adaptation Strategies for Global Change 2005 10 335 353 Springer 2005 ADAPTATION OPTIONS STRATEGIES FOR HAZARDS AND VULNERABILITY MITIGATION AN INTERNATIONAL PERSPECTIVE 1 2 C EMDAD HAQUE and IAN BURTON 1 Natural Resources Institute University of Manitoba Winnipeg Manitoba Canada 2 Institute for Environmental Studies University of Toronto Toronto Ontario Canada Author for correspondence Tel 204 474 8375 Fax 204 261 0038 E mail haque@ce.ms.umanitoba.ca Received 15 May 2004 accepted in final form 17 July 2004 Abstract The broad objective of this special issue of Mitigation and Adaptation Strategies for Global Change is to address some of the gaps in our knowledge and understanding of the policies programs and measures that might be applied to natural hazards and their impacts in an era of climate change Given the global impacts of climate change and world wide pattern of increasing losses from natural hazards we necessarily adopt an international perspective The specific goals of the special issue are to a encompass experiential aspects emphasizing current practice of mitigation and its associated measures and their results and b explore primary or root causes of alarming shifts in human and economic costs of environmental extremes **Power Switch** G. Bruce Doern, Monica Gattinger, 2003-01-01 In the energy sector of Canadian economic and political life power has a double meaning It is quintessentially about the generation of power and physical energy However it is also about political power the energy of the economy and thus the overall governance of Canada Power Switch offers a critical examination of the changing nature of energy regulatory governance with a particular focus on Canada in the larger contexts of the George W Bush administration's aggressive energy policies and within North American energy markets Focusing on the key institutions and complex regimes of regulation Bruce Doern and Monica Gattinger look at specific regulatory bodies such as the National Energy Board the Alberta Energy and Utilities Board and the Ontario Energy Board They also examine the complex systems of rule making that develop as traditional energy regulation interacts and often collides with environmental and climate change regulation such as the Kyoto Protocol on reducing greenhouse gas emissions Power Switch is one of the first accounts in many years of Canada's overall energy regulatory system Global Public Policy Karsten Ronit, 2006-12-12 We are in a critical period where civil society organizations actively influence business political behaviour while corporations and business associations are adopting new and flexible strategies aimed at closer contact with civil society Against the

backdrop of such broad reorientations this book analyzes the new and changing roles of business and civil society actors to offer an accurate portrayal of the formation of global public policy With contributions from leading experts in the field it investigates the potential for and emergence of new policy arrangements along with their patterns of conflict and cooperation Building upon theoretical inspirations from various traditions studying international affairs this volume develops and applies the concepts of policy arrangements and countervailing power to the field of global business civil society relations A range of key issues including labour consumers global finance the mining industry climate policy and the World Economic and Social Forums are examined Global Public Policy will be of strong interest to students and researchers of international political economy international relations and international business

Implementing Sustainable Development William M. Lafferty, James Meadowcroft, 2000-11-30 At the Rio Earth Summit in 1992 political leaders from more than a hundred countries made a formal commitment to intensify efforts to resolve global environment and development problems and to strive for sustainable development This volume examines how governments in the developed industrial world have responded to the challenge of sustainable development since it was catapulted into the international stage It focuses on the central government engagement with sustainable development in Australia Canada Japan Norway the Netherlands Sweden the United Kingdom the United States and the European Union The study shows that sustainable development has been integrated into

governmental idiom in most jurisdictions and has come to be associated with a series of changes to the structures and approaches deployed to manage environmental problems Yet it also reveals significant differences of interpretation and priority and in enthusiasm with which sustainable development has been received *Environmental Politics and Policy in Industrialized Countries* Uday Desai, 2002

Comparative analyses of environmental policy and politics in seven major industrialized nations **Canadian Energy Policy and the Struggle for Sustainable Development** G. Bruce Doern, 2005-01-01

In recent years energy policy has been increasingly linked to concepts of sustainable development In this timely collection editor G Bruce Doern presents an overview of Canadian energy policy gathering together the top Canadian scholars in the field in an examination of the twenty year period broadly benchmarked by energy liberalization and free trade in the mid 1980s and by Canada's ratification of the Kyoto Protocol in 2002 The contributors examine issues including electricity restructuring in the wake of the August 2003 blackout the implications of the Bush Administration's energy policies energy security northern pipelines and Aboriginal energy issues provincial changes in energy policy and overall federal provincial changes in regulatory governance They also demonstrate that since per capita energy usage has actually increased in the past several years sustainable development remains very much a struggle rather than an achievement When the Kyoto Protocol and its requirements for reductions in greenhouse gas emissions are factored in the Canadian record is especially dubious in basic energy terms *Canadian Energy Policy and the Struggle for Sustainable Development* is key to understanding many of the issues in Canada's endeavour to live up to its energy related environmental responsibilities

Governing Environment Sanjay Sharma, 2016-04-26 This book comparatively analyses the federal policies and financing of India and Canada It examines whether federalism as a system of governance is better suited to deal with environmental questions It operates from the assumption that federalism can provide an effective solution to the emerging concerns of the environment because it essentially provides a model of disaggregated governance without any extensive and intrusive mark of hierarchy It presents a uniquely exploration of environmental governance from this hitherto under researched perspective and simultaneously in order to provide a better conceptual understanding examines the different theories of federalism and modes of distribution of powers authorities and functions Given their symmetrical federal experiences India and Canada naturally qualify as the domain of study with both being known as twin federal nations Issues of environment have been factorised and classified according to their critical significance in terms of policy choices The combinatorial structure has been evaluated in terms of better federal management of environment In the process many new dimensions of federalism and environment have emerged which may contribute to the critical mass of knowledge on the subject This book makes a departure from the general mono construction of the environment as a restricted unit of knowledge available only to a specialist Broadly following an interdisciplinary logic of formation of idea this study is highly relevant in generating a new perspective on environmental research It defines environment as a system which requires careful redrafting and reworking

of three structures of relationships namely between man and environment between resource community and the state and between inter governmental contestations
