Stylometric Study Of The New Testament:

A Stylometric Study of the New Testament Anthony Kenny, 1986 With the aid of computers it is becoming possible to clarify some longstanding disputes over Biblical authorship Using statistical analysis of linguistic usage Kenny reexamines the authorship of Revelation the relationship between Luke and the Acts and the complex problem of the Pauline corpus He also comments on the general merits of the stylometric approach to textual analysis *New Testament Philology* Melton Bennett Winstead, 2018-04-17 This work is dedicated to David Alan Black a New Testament scholar who has contributed to the love of the Koine Greek language as it pertains to New Testament studies in numerous ways as a professor author missionary and editor The goal of this book is to demonstrate for students the value of continued research in the Greek New Testament The essays demonstrate how research is currently being done utilizing such tools as grammatical studies discourse analysis textual criticism verbal aspect and other linguistic analyses The chapters include studies on exegesis verbal aspect prepositional compounds relevance theory and scripture memorization This book demonstrates the explanatory power of an in depth usage of New Testament Greek It is recommended for those who have had at least one year of Greek

The New Testament Donald A. Hagner, 2012-11-15 This capstone work from widely respected senior evangelical scholar Donald Hagner offers a substantial introduction to the New Testament Hagner deals with the New Testament both historically and theologically employing the framework of salvation history He treats the New Testament as a coherent body of texts and stresses the unity of the New Testament without neglecting its variety Although the volume covers typical questions of introduction such as author date background and sources it focuses primarily on understanding the theological content and meaning of the texts putting students in a position to understand the origins of Christianity and its canonical writings Throughout Hagner delivers balanced conclusions in conversation with classic and current scholarship The book includes summary tables diagrams maps and extensive bibliographies *Stylometry and the Pauline Epistles* George K. Barr, 2004-06-15 Scale is well known and understood in creative arts such as architecture sculpture and music but New Testament scholars have given no significant consideration to scale changes in the Biblical texts A robust methodology allows scale changes in literature to be examined scientifically and reveals scale related patterns in the epistles To determine the significance of these patterns George Barr has conducted a wide survey covering many texts in Greek Latin and English It reveals that the patterns found in the New Testament are very rare indeed if not unique and gives grounds for the belief that such patterns are associated with authorship The patterns found in the Pauline epistles clarify some theories regarding the origins of the epistles and in some cases shed new light on their compilation **Statistical Approaches to Paul's Letters** Paul Robertson, 2025-09-18 This book demonstrates the utility of statistical and computational approaches to Paul's letters Such work helps resolve questions of authorship describes and quantifies aspects of Paul's style and explains structural relationships within and between Paul's letters A series of linked case studies deploy a shared set of top down stylistic

features to differentially analyse Paul's seven undisputed letters. Each chapter explores a different digital approach co-written with a subject expert in this method. Chapters range from a history of the field to theoretical branches of mathematics with each chapter providing a case study applying a different method to issues within Pauline Studies with progressively more sophisticated statistical, computational and mathematical models. Counting Paul Benjamin L. White, 2025-04-15 Who wrote the Pauline Epistles For nearly 1 700 years the answer seemed fairly straightforward The New Testament canon set the boundary at thirteen or fourteen including Hebrews Pauline Epistles alongside an uncontroversial biographical framework within which to imagine them in Acts In the early nineteenth century the identification of the historical Paul with the canonical Paul was severed when theologian Ferdinand Christian Baur of the University of Tübingen laid the groundwork for the fundamental historiographical moves that still orient Pauline Studies as a critical discipline by both delimiting the number of authentic Pauline Epistles and highlighting the tendentious character of Acts portrayal of Paul Given the highly uncertain and subjective nature of so much of the argumentation over the authenticity of the Pauline Epistles as it developed in the nineteenth century the analysis of authorial style took on increasing weight as a way out of so many special decisions The linguistic features of texts were counted averaged and compared In measuring one text against another the Pauline stylome emerged as the incontrovertible standard for uncovering canonical forgeries in the Apostle's name Tracing the long history of the computational approach to the Pauline authorship problem *Counting Paul* exposes the ideological foundations and questionable science of much of the work and argues that Pauline biography ought not be written from fewer sources than what the New Testament has given us but rather more It advocates for a more expansive vision of what might count as Pauline by reorienting our focus away from internal criteria like appeals to style and toward external criteria like the reception of Paul in the generations after his death

The Making of the New Testament Documents Edward Earle Ellis, 2002 This volume identifies and investigates literary traditions and their implications for the authorship and dating of the Gospels and the letters of the New Testament Ellis argues that the Gospels and the letters are products of the corporate authorship of four allied apostolic missions and not the creation of individual authors
