Subregional Cooperation New Europe:

Subregional Cooperation in the New Europe Andrew Cottey, 1999-04-12 Based on a major international research project undertaken by The Institute for East West Studies this book provides the first comprehensive analysis of an important but little explored feature of post Cold War Europe the emergence of subregional cooperation in areas such as the Barents the Baltic Sea Central Europe and the Black Sea It analyses the role of subregional cooperation in the new Europe provides detailed case studies of the new subregional groups and examines their relations with NATO and the European Union

Building Security in Europe's New Borderlands Renata Dwan, 2016-07-08 While European integration advances many of the countries along Europe's eastern and southern periphery have fallen prey to chronic conflict punctuated by a series of small wars Exacerbating the situation has been the lack of effective organizational means for mediating local conflicts facilitating regional development and structuring cooperation with larger regional and international institutions What are the prospects for enhancing security in the most volatile subregions of post communist Europe This text examines the external and internal factors that impede or foster subregional cooperation in South Eastern and East Central Europe and the Caucasus It includes chapters situating these borderlands in the context of a wider Europe with an evolving security architecture

Central and Southeast European Politics since 1989 Sabrina P. Ramet, 2010-02-18 The only textbook to provide a complete introduction to post 1989 Central and Southeast European politics this dynamic volume provides a comprehensive account of the collapse of communism and the massive transformation that the region has witnessed It brings together 23 leading specialists to trace the course of the dramatic changes accompanying democratization The text provides country by country coverage identifying common themes and enabling students to see which are shared throughout the area giving them a sense of its unity and comparability whilst strengthening understanding around its many different trajectories The dual thematic focus on democratization and Europeanization running through the text also helps to reinforce this learning process Each chapter contains a factual overview to give the reader context concerning the region which will be useful for specialists and newcomers to the subject alike

Perspectives on the Enlargement of the European Union Cameron Ross, 2021-09-06 In a historic decision at its Copenhagen Conference in June 1993 the European Union gave the

green light to an eastward expansion Initially invitations to join the EU went out to just six countries of the former Soviet bloc Poland Hungary the Czech and Slovak republics Romania and Bulgaria However it was not long before there was a queue of other applicants from Eastern Europe pressing at the EU's gates There were real fears in some quarters that the economic reforms demanded for entry into the EU would bring about more shock than therapy in Eastern Europe and that a rapid move to the market would undermine support for democracy This volume of essays by a group of internationally recognised experts focuses on the eastward expansion of the European Union and the EU's relations with the applicant states The primary aim of the volume is to provide a historical and analytical account of the enlargement process and to provide readers with a scholarly road map to guide them through the intricacies of the rapidly changing enlargement terrain After region wide studies of the enlargement process there are case studies of eight countries Bulgaria Romania the Czech Republic Slovakia Croatia Serbia Poland and Estonia

Sub-regionalisms in the European Union: Bridge-builders or spoilers?

Anna-Lena Kirch, 2021-09-14 In today's interconnected differentiated and polarized European Union sub regional groupings between the national and EU level are a highly relevant empirical phenomenon Despite their importance the interactions between sub regionalisms and EU actors and processes remain under researched This book fills this large research gap by applying a systematic comparative approach Taking into account a huge corpus of empirical data gained through expert interviews and document analysis this study provides the conceptual and empirical groundwork necessary to better understand EU sub regionalism For the timeframe between 2009 and 2018 it analyses the scope of sub regional cooperation in the Baltic Benelux and Visegrád groupings Moreover it compares their respective institutional design political identity foreign policy as well as their external recognition by EU actors A special focus lies on their role in six EU policy cases including EU budget negotiations TTIP the drafting process of the EU Global Strategy refugee relocation quotas the revision of the posted workers directive and defence cooperation through PESCO In its conclusion this book identifies two sub regional archetypes functional hubs and political tools While differing in many regards the shared assessment finds that the overall bridge building efforts of the Baltic Benelux and Visegrád sub regionalisms exceed their spoiling potential

Law, Culture and Identity in Central and

Eastern Europe Cosmin Cercel, Alexandra Mercescu, Mirosław Michał Sadowski, 2023-12-01 Combining insights from comparative legal theory jurisprudence and legal history this collection examines the legal and constitutional identity of Central and Eastern Europe Although the various countries of Central and Eastern Europe have often compared themselves to the West the failure of these countries to engage with one another has resulted in a whole spectrum of legal identities

remaining hidden This book takes up a comparison of such identities within the region of Central and Eastern Europe and following from the prima facie similarity between the region's countries given the experience of communism and legal transfers The book thereby illuminates through comparisons the distinct legal identities of the 16 Central and Eastern European states whilst at the same time arguing for a shared Central and Eastern European legal identity This book will appeal to scholars and students in the area of comparative law as well as lawyers political scientists sociologists and historians with particular interests in Central and Eastern Europe

Regionalism in the Post-Cold War World Stephen Calleya, 2018-03-29 This title was first published in 2000 This text describes analyzes and projects the implications of regionalism on contemporary international relations Regional policy positions are examined in order to increase our understanding of how the direct impact patterns of relations at a regional level of analysis are having in the shifting balance of international power The book clarifies what types of regional dynamics are manifesting themselves in different parts of the world and consists of both theoretical and empirical assessments similar to those developed in the author's previous book on regionalism that ensures that the comparative analysis conducted is a comprehensive and coherent one

Limiting institutions? James Sperling, Sean Kay, Victor Papacosma, 2018-07-30 Eurasian security governance has received increasing attention since 1989 The North Atlantic Treaty Organisation the institution that best served the security interests of the West in its competition with the Soviet Union is now relatively ill equipped resolve the threats emanating from Eurasia to the Atlantic system of security governance This book investigates the important role played by identity politics in the shaping of the Eurasian security environment It investigates both the state in post Soviet Eurasia as the primary site of institutionalisation and the state's concerted international action in the sphere of security This investigation requires a major caveat state centric approaches to security impose analytical costs by obscuring substate and transnational actors and processes The terrorist attacks on the World Trade Center and the Pentagon marked the maturation of what had been described as the new terrorism Jervis has argued that the western system of security governance produced a security community that was contingent upon five necessary and sufficient conditions The United States has made an effort to integrate China Russia into the Atlantic security system via the Partnership for Peace PfP programme and the Euro Atlantic Partnership Council The Black Sea Economic Cooperation has become engaged in disseminating security concerns in fields such as environment energy and economy If the end of the Cold War left America triumphant Russia's new geopolitical hand seemed a terrible demotion Successfully rebalancing the West and building a collaborative system with Russia China Europe and America probably requires more wisdom and skill from the world's leaders An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence
