Phenomenology of Life and the Human Creative Condition Anna-Teresa Tymieniecka,1997-12-31 Self individualization has been interpreted as the process in which the all embracing Self unfolds into an infinite variety of different individuals plants animals and men A comparison of the different ways in which the Self manifests itself in the biological and psychological developmental processes or in a visionary image of the undivided Self reveals the same basic structure of expression The Self the one is represented by a circular domain and comprises a basic inner duality the two creating a paradox of conflicting opposites In the undivided Self the two give rise to a trinity in which however a quaternity is hidden The latter expresses itself in this world as the four basic forces the four Elements or the four main archetypes specifying the possibilities or development in space and time Self individualization starts with the first appearance of a primary structure of an individual sub Self This is the fifth basic force the fifth Element Further development is characterized by four generative principles 1st the principle of wholeness connection and integration being oriented to remaining whole or restoring wholeness 2nd the principle of complementarity and compensation a periodic shift between opposing influences 3rd the structuring principle causing the relative stability of the spatial appearance of the manifest structure and 4th the principle of gesture resulting in a gradual stepwise development of that structure into a full grown individual

The Communications Toolkit P. H. Longstaff,2002 A toolkit of basic principles to help those in business industry law and other professions deal with a constantly changing communications sector Although telephone cable broadcast print and Internet companies are changing at a fantastic rate the fundamentals of communications networks and competition have remained constant This book provides the tools necessary to build lasting flexible strategies to survive and grow in these times of transition Whether you are a business executive lawmaker policy analyst industrialist stock analyst lawyer or judge these tools will help you to solve real problems right away The toolkit contains six tools essentially ways to view the workings of the communications sector from a larger more inclusive

perspective The tools draw on knowledge and concepts from communications engineering biology business and law Tool 1 New Building Blocks presents the big picture of the communications sector Tool 2 Networks develops the fundamental parts and processes found in all networks Tool 3 Competition and Cooperation presents the basic characteristics shared by most processes in which two or more entities compete or cooperate to obtain a scarce resource Tool 4 The Three Visions of Convergence sorts out the many things people mean when they say convergence Tool 5 Convergence Theology shows how people's faith or lack of it in convergence influences their predictions for the future Finally Tool 6 Concentration Diversity focuses on the forces that drive things together and those that pull them apart The book also discusses how the tools can be used to understand and influence public policy issues **Neocybernetics and Narrative** Bruce Clarke, 2014-09-15

Neocybernetics and Narrative opens a new chapter in Bruce Clarke's project of rethinking narrative and media through systems theory Reconceiving interrelations among subjects media significations and the social this study demonstrates second order systems theory's potential to provide fresh insights into the familiar topics of media studies and narrative theory A pioneer of systems narratology Clarke offers readers a synthesis of the neocybernetic theories of cognition formulated by biologists Humberto Maturana and Francisco Varela incubated by cyberneticist Heinz von Foerster and cultivated in Niklas Luhmann's social systems theory From this foundation he interrogates media theory and narrative theory through a critique of information theory in favor of autopoietic conceptions of cognition Clarke's purview includes examinations of novels Mrs Dalloway and Mind of My Mind movies Avatar Memento and Eternal Sunshine of the Spotless Mind and even Aramis Bruno Latour's idiosyncratic meditation on a failed plan for an automated subway Clarke declares the era of the cyborg to have ended laid to rest as the ontology of technical objects is brought into differential coordination with operations of living psychic and social systems The second order discourse of cognition destabilizes the usual sense of cognition as conscious awareness revealing the possibility of nonconscious and nonhuman forms of sentience Concepts of

Pendleton-Jullian, John Seely Brown, 2018-12-04 Tools for navigating today's hyper connected rapidly changing and radically contingent white water world Design Unbound presents a new tool set for having agency in the twenty first century in what the authors characterize as a white water world rapidly changing hyperconnected and radically contingent These are the tools of a new kind of practice that is the offspring of complexity science which gives us a new lens through which to view the world as entangled and emerging and architecture which is about designing contexts In such a practice design unbound from its material thingness is set free to design contexts as complex systems In a world where causality is systemic entangled in flux and often elusive we cannot design for absolute outcomes Instead we need to design for emergence Design Unbound not only makes this case through theory but also presents a set of tools to do so With case studies that range from a new kind of university to organizational and even societal transformation Design Unbound draws from a vast array of domains architecture science and technology philosophy cinema music literature and poetry even the military It is presented in five books bound as two volumes Different books within the larger system of books will resonate with different reading audiences from architects to people reconceiving higher education to the public policy or defense and intelligence communities The authors provide different entry points allowing readers to navigate their own pathways through the system of books **Organisation Development** James Traeger, Rob Warwick, 2018-04-16 There are many books on Organisational Development but to the reflective practitioner who is curious about their practice there can be a disconnect between the simplicity of theory and the often messy reality of practice Organisation Development A Bold Explorer's Guide explores the realities that they encounter in a way that gives practitioners hope that this is a shared experience in fact it is normal and that out of all of this progress can be made In exploring everyday interactions with their fascinating textures and details important clues for practice and theory can be found This book offers the opportunity to appreciate how events in which we are all involved are connected It is in the detail for example the corridor conversation with a senior director that things can be said that affect the lives of many Therefore organisation development never stops or starts It is a continuing series of interactions in which we have choices These choices are creative and artful as well as practical and ethical and the authors show how any of us might weigh these complex balances and move forward Organisation Development A Bold Explorer's Guide challenges the received building blocks of organisation development putting the curious reflexive individual at the heart of their own development It is written for those who are keen to develop their practice from the ground up and who are looking for inspiration to take their own experience seriously **Behavior Analysis and Substance Dependence** Simone Martin Oliani, Richard Alecsander Reichert, Roberto Alves Banaco, 2021-09-23

This book presents the main theoretical and practical tools provided by behavior analysis to diagnose and treat substance use disorders. Based on the theoretical framework of radical behaviorism first developed by B F Skinner, behavior analysis offers a distinctive biopsychosocial approach to substance use disorders by considering both the biogenetic and environmental influences on behaviors associated with substance use, enabling the development of more integrative and effective diagnostic prevention and treatment strategies at the individual and collective level. The volume is divided in three parts. Part one presents an introduction to core concepts in behavior analysis and related disciplines such as behavioral pharmacology and their specific applications in substance use disorders diagnostics and treatment. Part two shows how different types of behavioral analytical clinical and social interventions can be applied in practice to treat substance use disorders such as Contingency Management, Exposure Therapy, Functional Analytical Psychotherapy (FAP), Dialectical Behavioral Therapy (DBT), Acceptance and Commitment Therapy (ACT), Therapy by Contingencies of Reinforcement (TCR), Motivational Interviewing. Finally, part three covers special topics such as the interfaces between neurosciences and behavior analysis on drug use and dependence, effects of substance use in romantic relationships and their relationship with violence against women. Behavior Analysis and Substance Dependence will be a valuable tool for clinical and health psychologists as well as other health professionals and social workers dealing with substance use disorders by presenting in one single volume an overview of the tools offered by behavior analysis to deal with this serious health issue.

A Field Guide for Organisation Development Mike Alsop, Ed Griffin, Martin Saville, Grahame Smith, 2016-03-23. Organisation Development as a field is messy, imperfect and hard to get hold of; it is like nailing jelly to the wall. *A Field Guide for Organisation Development* offers a variety of perspectives and unparalleled experiences from practitioners and researchers who all share an interest and involvement in Organisation Development (OD). In it are multiple voices, mindsets and practices, not all of which necessarily agree with each other. Leading OD practitioners present a contemporary practical guide that tackles the dilemmas and polarities that face anyone studying or practising within the OD arena and encourages them to develop their own particular practice of OD in a way that is appropriate for their context, skills and preferences while challenging them to look beyond what comes naturally. Here are new ways to support the growth and development of an organisation from modest endeavours that are small in scale to organisation wide change programmes. *A Field Guide for Organisation Development* is as comprehensive a resource to support the practice of OD as can be found anywhere. It covers issues of organisational health as well as offering tools aimed at supporting practitioners to survive in the harsh realities of organisational life. It contains chapters on the OD practitioner, on groups, on culture, on data and evaluation. It offers perspectives on change, on the relationship between OD and HR and on the use of external consultants.
