Subversive Science Essays Toward An Ecology Of Man:

The Subversive Science Paul Shepard, 1969 Population explosion pollution suburban sprawl death of the city the vanishing wilderness we keep hearing of these threats but usually manage to ignore them In this book we find instead a number of clear calm discussions of environmental problems providing information and ideas without excessive emotional appeal The 37 papers chosen from a wide variety of journals such as Human Biology Daedalus Landscape American Scientist are obviously intended for the nonspecialist intelligent reader They are divided into five groups of which the first deals with population problems both human and animal The Environmental Encounter is the title of a group of papers discussing man's reaction to his environment what he sees and the way he feels about it Here are included comments on American front yards the shapes of roofs in different European countries the importance of sacred places and an essay by Alan Watts reprinted from The Psychedelic Review The third and fourth sections are called Man and Other Organisms and Man in Ecosystems Here we learn about the domestication of cattle sidelights on evolution Ren Dubos comments on the germ theory the possible unexpected effects of pesticides and radiation A hopeful note appears in a discussion of the use of solar energy The final part called Ethos Ecos and Ethics includes more philosophical commentaries Especially interesting is a discussion by Lynn White of the historical roots of our ecologic crisis from a review by Marjorie C Meehan in [jama.jamanetwork.com article.asp?articleid=345416](http://jama.jamanetwork.com/articleid/345416) **The subversive science: essays toward an ecology of man**, ed Paul Shepard, Daniel McKinley,

[EPA-600/5](http://www.epa.gov/epa-600/5) , 1974-02 *Radical Ecopsychology, Second Edition* Andy Fisher, 2013-01-01 Expanded new edition of a classic examination of the psychological roots of our ecological crisis **Environmental Crisis** M. Rowlands, 2000-06-05 The worst chemical disaster ever could be happening right now In India and Bangladesh between forty and eighty million people are at risk of consuming too much arsenic from well water that might have already caused one hundred thousand cancer cases and thousands of deaths Many millions elsewhere in South East Asia and South America may soon suffer a similar fate *Venomous Earth* is the story of this tragedy the geology the biology the politics and the history It starts in Ancient Greece touches down in today's North America and takes in William Morris alchemy farming medicine mining and a cosmetic that killed two popes **The Essential Ian McHarg** Ian L. McHarg, 2006-11-13 A concise illuminating collection of essential essays from one of the pioneers of the field of landscape architecture **Defending The Little Desert** Libby Robin, 2015-09-08 In 1968 Sir William McDonald Victoria's Minister of Lands announced a rural settlement scheme for the Little Desert in Victoria's far north west The conservation campaign that ensued was one of unprecedented vehemence and sophistication It cost McDonald his parliamentary seat and consigned the Little Desert Settlement Scheme to oblivion The Little Desert dispute was a watershed in Australian environmental politics Suburban activists scientists amateur naturalists economists and bureaucrats banded together to oppose McDonald's ill conceived scheme It marked the beginning of a new consciousness of nature and the concept of biological diversity was voiced in the halls of parliament for the first time In

Defending the Little Desert Libby Robin offers a sensitive account of the unlikely coalition of forces that assembled to save the Little Desert This beautifully written account of the campaign perhaps the earliest expression of ecological consciousness in Australia will be read by all Australians interested in conservation and the environment in participatory political processes and in public science

Sustainable Poetry Leonard M. Scigaj,2021-12-15 Focusing on the work of A R Ammons Wendell Berry W S Merwin and Gary Snyder author Leonard Scigaj shows that just as a sustainable society does not depreciate its resource base so a sustainable poetry does not restrict interest to language Over the past thirty years many poets have shown an increasing sensitivity to ecological thinking But critics trained in poststructuralist language theory often fail to explore the substance of ecopoetry Scigaj is the first to define ecopoetry as separate and distinct from nature or environmental poetry marked by its concern with balancing the interests of human beings with the needs of nature Just as science learned that the earth was not the center of the universe ecopoetry insists on the recognition that humans are not at the center of the natural world

Metaphors for Environmental Sustainability Brendon Larson,2011-06-28
DIVScientists turn to metaphors to formulate and explain scientific concepts but an ill considered metaphor can lead to social misunderstandings and counterproductive policies Brendon Larson observes in this stimulating book He explores how metaphors can entangle scientific facts with social values and warns that particularly in the environmental realm incautious metaphors can reinforce prevailing values that are inconsistent with desirable sustainability outcomes Metaphors for Environmental Sustainability draws on four case studies two from nineteenth century evolutionary science and two from contemporary biodiversity science to reveal how metaphors may shape the possibility of sustainability Arguing that scientists must assume greater responsibility for their metaphors and that the rest of us must become more critically aware of them the author urges more critical reflection on the social dimensions and implications of metaphors while offering practical suggestions for choosing among alternative scientific metaphors div
