Success Strategies From Women in STEM Peggy A. Pritchard, Christine Grant, 2015-06-11 **Success Strategies from Women in Stem A Portable Mentor Second Edition** is a comprehensive and accessible manual containing career advice mentoring support and professional development strategies

for female scientists in the STEM fields This updated text contains new and essential chapters on leadership and negotiation important coverage of career management networking social media communication skills and more The work is accompanied by a companion website that contains annotated links a list of print and electronic resources self directed learning objects frequently asked questions and more With an increased focus on international relevance this comprehensive text contains shared stories and vignettes that will help women pursuing or involved in STEM careers develop the necessary professional and personal skills to overcome obstacles to advancement Preserves the style and tone of the first edition by bringing together mentors trainees and early career professionals in a series of conversations about important topics related to careers in STEM fields such as leadership time stress negotiation networking social media and more Identifies strategies that can improve career success along with stories that elucidate engage and inspire Companion website provides authoritative information from successful women engaged in STEM careers including annotated links to key organizations associations granting agencies teaching support materials and more Learning to Succeed in Science Saima Salehjee, Mike Watts, 2023-06-29 This book offers a positive and compelling exploration of how young south Asian women can be encouraged to study science further and to consider STEM as a career Drawing together both intersectional and personal perspectives the book celebrates south Asian culture sharing the stories of these individuals their multifaceted identities aspirations and successes At the micro level an intersectional analysis reveals complicated identity negotiations of being young female a science orientated student imigr Muslim a daughter and a sister as well as how these identities might interact nest and shift The chapters build on the authors previous work in science education developing models of science identity Sci ID and women s engagement with the study of science and their aspirations for a science based career Work, Life, and Family Imbalance Michele A. Paludi, Presha E. Neidermeyer, 2007-09-30 Workers everywhere feel the tug of war between work and home Do they go to a child s game or stay late to finish up a spreadsheet How should they respond when a boss wants to talk about a new project just as they re leaving home to attend a religious service How do they justify an unexpected weeklong business trip to a spouse Managers struggle as well How much on time should they expect from their employees How can they allocate work properly when many employees serve as irreplaceable caregivers to children and elderly parents Should organizational needs prevail over family come crunch time Welcome to the world of work in the twenty first century where 24 7 work obligations and always on electronic tools ensure that work and family conflict on a daily basis Michele Paludi and Presha Neidermeyer offer solutions by bringing together leading thinkers on the problem of balancing home and family life Going far beyond commonplace prescriptions their new approaches and insights for both individuals and organizations offer hope to those caught in the vise of conflicting expectations Work Life and Family Imbalance showcases the most current and innovative practices in solving the work life crisis These practices will shed new light on the issues and help individuals find a sane yet productive approach to balancing work and life And they will help organizations promote family friendly policies that

benefit both individuals and the organization Applying insights from the fields of management ethics sociology and law the authors go beyond traditional approaches to offer fresh thinking and methods for individuals and organizations as well as groups with special needs nontraditional families academic families and those with care giving responsibilities Along the way Paludi and Neidermeyer dispel common myths and misconceptions regarding work life balance and they offer practical strategies for achieving balance from both the individual s and organization s point of view Most important the book concludes with a series of templates for developing workplace policies and training programs that promote employee well being and corporate profitability Managers and business leaders of all stripes will find *Work Life and Family Imbalance* an invaluable aid in creating policies that keep employees and their families happy while not just maintaining but boosting the bottom line What s more they ll learn a few things about maintaining a productive balance in their own lives

The Underrepresentation of Women in Science: International and Cross-Disciplinary Evidence and Debate Stephen J. Ceci, Wendy M. Williams, Shulamit Kahn, 2018-04-20 There is no shortage of articles and books exploring women s underrepresentation in science Everyone is interested academics politicians parents high school girls and boys women in search of college majors administrators working to accommodate women s educational interests the list goes on But one thing often missing is an evidence based examination of the problem uninfluenced by personal opinions accounts of lived experiences anecdotes and the always encroaching inputs of popular culture This is why this special issue of *Frontiers in Psychology* can make a difference In it a diverse group of authors and researchers with even more diverse viewpoints find themselves united by their empirical objective approaches to understanding women s underrepresentation in science today The questions considered within this special issue span academic disciplines methods levels of analysis and nature of analysis what these articles share is their scholarly evidence based approach to understanding a key issue of our time

Alliances for Advancing Academic Women, 2014-01-01 This unique book provides important guidelines and examples of ways STEM e g science technology engineering and mathematics faculty and administration can collaborate towards goals of recruiting mentoring and promoting leadership to academic women faculty Based on the experiences of faculty across five Florida universities including one national laboratory each chapter highlights one aspect of a multi institutional collaboration on an NSF ADVANCE PAID grant dedicated to achieving these three goals Highlighting the importance of coordination integration and flexibility each chapter details strategies and challenges of establishing a multi site collaboration assessing climate in STEM departments addressing differential institutional readiness and infrastructure and implementing change The authors suggest ways to build on intrainstitutional strengths through interinstitutional activities including shared workshops research and materials Separate chapters focus on recruiting women into STEM departments mentoring women faculty and providing leadership opportunities to women A theoretical chapter includes Cultural historical activity theory as a lens for examining the alliances activities and evaluation data Other chapters present research on women STEM faculty contributing insights

about STEM women's sense of isolation. Chapters include a reflective metalogue written by a social scientist. The book closes with lessons learned from this collaboration.

Silwood Circle, The: A History Of Ecology And The Making Of Scientific Careers In Late Twentieth-century Britain Hannah Gay, 2013-04-12. This is an original and wide ranging account of the careers of a close knit group of highly influential ecologists working in Britain from the late 1960s onwards. The book can also be read as a history of some recent developments in ecology. One of the group Robert May is a past president of the Royal Society and the author of what many see as the most important treatise in theoretical ecology of the later twentieth century. That the group flourished was due not only to May's intellectual leadership but also to the guiding hand of T R E Southwood. Southwood ended his career as Linacre Professor of Zoology at the University of Oxford where he also served a term as Vice Chancellor. Earlier as a professor and director of the Silwood Park campus of Imperial College London he brought the group together. Since it began to coalesce at Silwood it has been named here the Silwood Circle. Southwood promoted the interests of its members with the larger aim of raising the profile of ecological and environmental science in Britain. Given public anxiety over the environment and the loss of ecosystems his actions were well timed. Ecology which had been on the scientific margins in the first half of the twentieth century came to be viewed as a science central to modern existence. The book illustrates its importance to many areas. Members of the Silwood Circle have acted as government advisors in the areas of conservation and biodiversity resource management pest control food policy genetically modified crops sustainable agriculture international development defence against biological weapons and epidemiology and infectious disease control. In recounting the science they carried out and how they made their careers the book reflects also on the role of the group and the nature of scientific success.

Informed Transitions Kenneth J. Burhanna, 2013-02-07. How can libraries and librarians across the educational continuum work together to support student transitions from high school to college utilizing free or low cost resources? This book supplies the answers. *Informed Transitions: Libraries Supporting the High School to College Transition* identifies the ways in which libraries and librarians can work together and create valuable resources that help students transition successfully to college despite the challenges of increasing demand and diminishing resources. The book is organized into three sections: background, expectations and skills, conversations and collaborations, and programs and resources. Section 1 establishes a foundational understanding of the libraries' role in supporting college transitions. Section 2 shares model conversations that move this work forward, stressing its collaborative nature. The third section highlights some well established programs and resources that effectively support high school to college transitions. Practical information is provided throughout, pinpointing what high school students need to know to smoothly transition to college, spotlighting the expectations of college professors, and discussing audience specific methods of working with students at the high school and college levels.

The STEM Pathway and Student Retention Carita Harrell, David G. Capco, 2021-03-11. This work introduces methods that aid in freshman retention in the transition from high school and to remain in the university of origin.

and orient them towards a successful career in science Specific examples of successful approaches are given as well as detailed plans for how to engage these students Pitfalls as well as success are described In addition this work provides a detailed description of how to develop the students into a cohort that exhibits comradery Three types of cohort form those within the freshman class those among the upperclassmen and those between the freshmen and upperclassmen The program works because the social reality is that the peer mentor has a better repertoire with the first semester freshmen than the faculty or staff and assists with student success Factors such as financial aid policy and support systems influence student success In the sciences students often struggle with the content and adjusting to the college experience Research states that a mentorship program supports retention as well as enhances the student experience during college This program creates a cohort group among the upperclassmen mentors and freshmen and provides leadership development for all involved

Success Strategies For Women In Science A Portable Mentor Book Review: Unveiling the Power of Words

In a world driven by information and connectivity, the ability of words has become more evident than ever. They have the ability to inspire, provoke, and ignite change.
