Sudbury Valley School Experience:

Legacy of Trust Daniel Greenberg, Mimsy Sadofsky, 1992 *The Sudbury Valley School Experience*, 1992 *The Sudbury Valley School Experience* Daniel Greenberg, 1985 **Starting a Sudbury School** Daniel Greenberg, Mimsy Sadofsky, 1998 The Sudbury Valley School in Framingham Massachusetts is a nontraditional private school founded in 1968 based on the idea that a child is a person worthy of full respect as a human being It aimed to create a nurturing environment in which the children themselves choose what they wish to do and schedule their time This book is a guide summarizing the various steps necessary to found a Sudbury school based on interviews and information gathered from 14 schools and groups throughout the United States The first four chapters cover what kind of folks are founders what makes them interested how founder groups get formed and characteristics important within the founders group The chapter on concrete steps to be taken includes understanding the philosophy formalization of status satisfying the appropriate educational authorities money matters site selection and promotion The next seven chapters address demographics staffing a Sudbury school where students come from the nitty gritty of staffing a school developing a culture and keeping the school going classic errors and factors enabling success Appendix 1 is a note from a founder who failed Appendix 2 is a narrative history of a school that survived its first 4 years Appendix 3 is another narrative of a school that is still going after 5 years Appendix 4 entitled Revolution or Reform presents thoughts on the character strategy and destiny of the original Sudbury Valley School TD

And Now For Something Completely Different Sudbury Valley School Press, 1994 *The Sudbury Valley School Experience*, 1987 Free to Learn Peter Gray, 2013-03-05 A leading expert in childhood development makes the case for why self directed learning unschooling is the best way to get kids to learn All kids love learning Most don't love school That's a disconnect we've avoided discussing until this lightning bolt of a book If you've ever wondered why your curious kid is turning into a sullen slug at school Peter Gray's Free to Learn has the answer He also has the antidote Lenore Skenazy author of Free Range Kids In Free to Learn developmental psychologist Peter Gray argues that in order to foster children who will thrive in today's constantly changing world we must entrust them to steer their own learning and development Drawing on evidence from anthropology psychology and history he demonstrates that free play is the primary means by which children learn to control their lives solve problems get along with peers and become emotionally resilient A brave counterintuitive proposal for freeing our children from the shackles of the curiosity killing institution we call school Free to Learn suggests that it's time to stop asking what's wrong with our children and start asking what's wrong with the system It shows how we can act both as parents and as members of society to improve children's lives and to promote their happiness and learning Where Have All the Flowers Gone? Alice Gerard, 2010-10-08 This book tells the stories of five private schools begun in the Northeastern US during the 1960s by idealistic believers in educational freedom Two of the schools have closed the other three are still open and flourishing Although the schools are different they share a belief in the individuality of each

child and his/her unlimited potential. Their stories are still relevant today. Schools for Growth Lois Holzman, 2016-05-06 A passionate deconstruction and reconstruction of learning, development, and schooling that urges teachers to explore and create new educational opportunities for themselves and their students. Schools for Growth: Radical Alternatives to Current Educational Models asks the following questions: Can we create ways for people to learn the kinds of things that are necessary for functional adaptation without stifling their capacity to continuously create their growth? Can schools become environments that support children to perform not only as learners but as developers of their lives? This book challenges educators to look at the deeply rooted assumptions about schooling, learning, and development and urges that the way psychology and education have constructed our conceptions of what it means to teach, to learn, and to grow may be the most serious impediment to the learning and developing of children. Beyond the criticism, the author presents an original methodological reformation of what learning and development are as relational activities and then takes readers on a visit to three radical independent school settings. Arguing that current educational models have been misguided by scientific psychology, the author states that the dominant model of human development actually hinders development. Moreover, as learning theory has become infused with developmental theory over the past 30 years, the overly cognitive manner in which psychologists have come to think about thinking, learning, and development has become further insinuated into education. Both theories, learning and developmental, fail to recognize the human capacity for relational, revolutionary activity and for performance. The prevalent mode of education, acquisitional learning, is grounded in a world view that gives primacy to knowledge and knowing, which Holzman believes is inconsistent with ongoing developmental activity. The author focuses on developmental learning, a social constructionist activity-theoretic conception of development which includes a transformation and synthesis of Vygotsky and philosopher Ludwig Wittgenstein. She also discusses educational projects that are self-conscious attempts to break with key elements of modern epistemology and the dominant psychological paradigm as they are perpetrated in contemporary educational theory and practice. Their specific philosophies and practices highlight important methodological issues raised in the attempt to create postmodern schools, schools more concerned with growing than knowing. *Resources in Education*, 1998
