Prophetic Culture Federico Campagna, 2021-06-17

Selected as one of The Tablet's Books of the Year 2021. Throughout history, different civilisations have given rise to many alternative worlds. Each of them was the enactment of a unique story about the structure of reality, the rhythm of time, and the range of what it is possible to think and to do in the course of a life. Cosmological stories, however, are fragile things. As soon as they lose their ring of truth and their significance for living the worlds that they brought into existence, they disintegrate. New and alien worlds emerge from their ruins. Federico Campagna explores the twilight of our contemporary notion of reality and the fading of the cosmological story that belonged to the civilisation of Westernised Modernity. How are we to face the challenge of leaving a fertile cultural legacy to those who will come after the end of our future? How can we help the creation of new worlds out of the ruins of our own?

Daidalos at Work Clair Palyvou, 2018-12-31 This is primarily a book on architecture and as such it seeks to bring forward the deeper forces that guide the work of all the sons and all the daughters of Daidalos Architecture is the protagonist whereas the prehistoric time of this architecture is as important as any other historical time This book is firmly based on the realities of a long silenced world available to us today through the agency of archaeology In that sense it addresses archaeologists architectural historians and architects alike in the hope that it will prove useful to those interested in understanding the Minoan world through its architecture as much as those interested in exploring architecture through the Minoan paradigm This dual goal emanates from my deep belief in the timeless and universal values of architecture As a teacher of history of architecture the challenge has been to bring history into the studios where future architecture is formulated to engage history in the discourse on current architectural ethos and practices and to show that an analytical and critical approach to the past is a potent tool for advancing architectural awareness and educating future architects I am equally confident that such an approach will return its benefits back to history for it will provide new tools of thought and methods of interpretation of the relics of the past Having set the scope of this book it is only fair to add what is not included in its goals the reader will not find a descriptive account of Minoan buildings and sites nor a list of the major architectural achievements in chronological order This is due not only to the enormous amount of relevant information that has been accumulated to date but also to an altogether different interest in the subject as described above Time however is crucial We have a mental need to grasp that we are rooted in the continuity of time and in the man made world it is the task of architecture to facilitate this experience Pallasmaa 2005b 32 Time related issues therefore such as permanence and change or tradition and innovation will concern us
