

BEHAVIOR MODELING

The idea of behavior modeling has its roots in social learning theory. This theory holds that children learn through observation.

DEFINITION

"Modeling describes the process of learning or acquiring new information, skills, or behavior through observation, rather than through direct experience or trial-and-error efforts." (Salisu & Ransom, 2014, p. 54)

EXAMPLE

The teacher first shows the students how to do a task before the students themselves have go. For example, a baseball teacher might talk the students through the right pose (stance, shoulder and elbow placement) for the pitcher before the students then each have a try.
