Myth of the Natural Laboratory Adrian Young, 2025-12-31 Outsiders have construed Pitcairn and Norfolk Islands as isolated natural laboratories since the nineteenth century The islands inhabitants descended from the eighteenth century mutineers of the British naval vessel Bount and their partners from Tahiti Tubuai Huahine and Raiatea have long been idealized by investigators as incomparable research subjects uniquely suited for the study of racial cultural and linguistic hybridity But how did these two Pacific islands come to be seen as natural experiments in the first place How was that idea shaped and contested in encounters between knowledge makers and the people they studied And how can we dismantle the myth of the Pacific Island as human laboratory today The Myth of the Natural Laboratory answers these questions by tracing two centuries of interest in both of these communities Across chapters on sailors colonial administrators anthropologists historians and linguists it critically historicizes the trope of the island as laboratory and argues for more critical examination of colonial science's reliance on Indigenous subjects Over time Pitcairn and Norfolk Islanders became on a per capita basis among the most studied people on earth often subject to dozens of investigations across their lifetimes to the point that they were sometimes accused by their investigators of being more expert in fieldwork than the fieldworkers who came to study them They inflected the ways investigations proceeded on both islands and leveraged the interest in their communities to stake their own claims and produce their own counternarratives Almost without exception researchers failed to acquire or produce the knowledge they sought This book suggests that far from becoming ideal natural experiments producing easily accessible knowledge both islands ultimately became sites of epistemic derangement places where attempts to produce knowledge were halted redirected or reconfigured Bringing recent conversations on imperial anxiety to bear on questions of science and empire Adrian Young studies these fractures and failures to produce knowledge showing the ways colonial paranoias and colonial histories deranged studiers practices categories and assumptions

Women Sailors and Sailors' Women David Cordingly, 2001-04-15 For centuries the sea has been regarded as a male domain Fisherman navy officers pirates and explorers roamed the high seas while their wives and daughters stayed on shore Oceangoing adventurers and the crews of their ships were part of an all male world or were they In this illuminating historical narrative maritime scholar David Cordingly shows that in fact an astonishing number of women went to sea in the great age of sail Some traveled as the wives or mistresses of captains A few were smuggled aboard by officers or seaman A number of cases have come to light of young women dressing in men s clothes and working alongside the sailors for months and sometimes years In the U S and British navies it was not uncommon for the wives of bosuns carpenters and cooks to go to sea on warships Cordingly s tremendous research shows that there was indeed a thriving female population from female pirates to the sirens of legend on and around the high seas A landmark work of women s history disguised as a spectacularly entertaining yarn *Women s Sailors and Sailor s Women* will surprise and delight readers
