Hope and Heresy Leigh T.I. Penman, 2019-06-12 Apocalyptic expectations played a key role in defining the horizons of life and expectation in early modern Europe Hope and Heresy investigates the problematic status of a particular kind of apocalyptic expectation that of a future felicity on earth before the Last Judgement within Lutheran confessional culture between approximately 1570 and 1630 Among Lutherans expectations of a future felicity were often considered manifestations of a heresy called chiliasm because they contravened the pessimistic apocalyptic outlook at the core of confessional identity However during the late sixteenth and early seventeenth centuries individuals raised within Lutheran confessional culture mathematicians metallurgists historians astronomers politicians and even theologians began to entertain and publicise hopes of a future earthly felicity Their hopes were countered by accusations of heresy The ensuing contestation of acceptable doctrine became a flashpoint for debate about the boundaries of confessional identity itself Based on a thorough study of largely neglected or overlooked print and manuscript sources the present study examines these debates within their intellectual social cultural and theological contexts It outlines for the first time a heretofore overlooked debate about the limits and possibilities of eschatological thought in early modernity and provides readers with a unique look at a formative time in the apocalyptic imagination of European culture Bookseller and the Stationery Trades' Journal , 1975

Organizing Hope Daniel Ericsson, Monika Kostera, 2019-12-27 Crumbling social institutions disintegrating structures and a profound sense of uncertainty are the signs of our time In this book this contemporary crisis is explored and illuminated providing narratives that suggest how the notion of hope can be leveraged to create powerful methods of organizing for the

future Chapters first consider theoretical and philosophical perspectives on hopeful organizing followed by both empirical discussions about achieving change and more imaginative narratives of alternative and utopian futures including an exploration of the differing roles of work creativity idealism inclusivity and activism

Hope in the Thought of Jacques Ellul Lawrence J. Terlizzese, 2005-10-30 Hope expresses more than an area of concentration in Ellul's thought it is the central idea that binds his disparate elements together Ellul believed that at this moment of history the world since 1945 hope must preoccupy our thinking and lives To understand hope we must first comprehend its absence This entails discerning what causes the absence of hope namely the world's embrace of technique and the abandonment of God Ellul also rejected these as a positive affirmation He wanted to make a firm distinction between reality and truth He affirmed modern abandonment as a realistic fact as an accurate analysis of the present condition not as an affirmation of the truth Hope is truth in Jesus Christ but truth must be asserted against these harsh facts He used facts to incite hope in believers to shake their complacency and to realize their actual condition in the world The idea of hope in the thought of Jacques Ellul can only be properly understood in light of dialectic struggle between negatives which amount to factual representations of the modern world and positives through which hope exerts itself in the face of these facts From this tension will issue personal resolve Technique has brought the world to great collective heights and achievements but this has come at the expense of personal ends and meaning Ellul attempted to bridge this gap by asserting individual meaning against the aggregated progress of technique without destroying the gains made by collective advance This represents the central dilemma in Ellul's thought how does one maintain meaning and personal aims in a world founded on corporate necessity from the Introduction
