Sketch for a World-picture John Vyvyan,1972 **The Aryan Path** Sophia Wadia,1975 Powerful Pictures: Rock Art Research Histories around the World Jamie Hampson,Sam Challis,Joakim Goldhahn,2022-12-29 Focusing on stunning paintings and engravings from around the world 16 papers interrogate the driving forces behind global rock art research Many of the motifs featured were created by indigenous hunter gatherer groups this book sheds new light on non Western rituals and worldviews many of which are threatened or on the point of extinction Aryan Path ,1975 Drawing and industrial art Duluth Public Schools (Duluth, Minn.),1919 *Studies in Religious Imagination and Symbolism* Albert D'Souza,2005-01-01 **New Images of Thought in the Study of Childhood Drawing** Laura Trafí-Prats,Christopher M. Schulte,2022-10-21 This book provides a revitalised account of the study of children s drawing by outlining a departure from existing approaches privileging developmentalist accounts and presenting drawing as a specialised human endeavour separated from other material entanglements constituting children s everyday experiences The book takes on current developments in the fields of early childhood arts and early childhood literacies to advocate for process oriented new materialist and decolonial approaches that re conceptualise the study of children s drawing It proposes a future oriented approach centred on thinking experimentally with a focus on nonrepresentational elements such as movement sensation intensity rhythm story and place which singularly assemble in drawing events Thus the book discusses drawing as a process of sense making that is not enclosed in the individualised body of the child and that unfolds corporeally in time and space It revises the relation of drawing with symbolisation by suggesting that the use of language and signs in drawing form in entanglement with matter and sensation in processes of creative speculation connected with the movement of thought Presenting a series of contributions by internationally recognised scholars and artists the book aims to create synergies between theory and practice that speak of everyday realities interconnecting children learning and sense making The Evolution of Paleontological Art Renee M. Clary,Gary D. Rosenberg,Dallas C. Evans,2022-01-28 This volume samples the history of art about fossils and the visual conceptualization of their significance starting with biblical and mythological depictions extending to renditions of ancient life in long vanished habitats and on to a modern understanding that paleoart conveys lessons for the betterment of the human condition Twenty nine chapters illustrate how art about fossils has come to be a significant teaching tool not only about evolution of past life but also about conservation of our planet for the benefit of future generations *Drawing multimodality's bigger picture: Metalanguages and corpora for multimodal analyses* Janina Wildfeuer,Claudia Lehmann,2024-07-30 Multimodality has most recently been described no longer as a research field or discipline on its own but rather as a stage of development within a field Bateman 2022a 49 The realization that 1 many different fields and disciplines now enter their own multimodal phase with new interest in multimodal phenomena and that 2 these disciplines all commit to the development of multimodality research with their own theoretical principles and

methodological tools brings with it not only an immense breadth of potential analytical objects but also many new meta methodological issues We need to find ways of combining insights from the variously imported theoretical and methodological backgrounds brought along by previous non multimodal stages of any contributing disciplines Bateman 2022a 49 At the same time the search for a meta methodology for multimodal analyses is pushed further by the recent trend towards more empirical approaches to multimodal phenomena and the development and use of larger multimodal corpora that just as well require theoretical and methodological refinements We need to develop ways of strengthening claims with robustly applicable methods which nevertheless remain firmly anchored theoretically Bateman 2022b 64 For a productive handling of these issues disciplinary triangulation and finding a common language or metalanguage Maton newest results from data collection methods and multimodal corpus analyses that expand the current quantitative work by e g applying existing theories and methods to larger datasets or exploring the newest communication technologies We are particularly interested in seeing how works addressing these aspects contribute to finding ways of productive triangulation and integration for and within a meta methodology for multimodality research This Research Topic aims to bring together scholars from a variety of disciplines interested in multimodality research to review explore and advance the contributions that John Bateman as one of the key figures in multimodality research has made to both theory and method building as well as to the driving forward of multimodal empirical and corpus analyses We welcome contributions that for example critically address the theoretical and methodological advancements that John Bateman has made with regard to the notions of semiotic mode discourse semantics genre textuality etc apply one of the many approaches that John Bateman has developed for the empirical analysis of multimodal artefacts e g the GeM model for page based documents his work on multimodal film and audio visual analysis and the discourse semantics and or annotation approach to visual narratives to larger corpora or currently newly developing communicative situations expand on one of the abovementioned aspects with new ideas and insights from disciplines that have not yet been included in multimodality research

Handbook of Research on Children's and Young Adult Literature Shelby Wolf, Karen Coats, Patricia Enciso, Christine Jenkins, 2011-04-27 This landmark volume is the first to bring together leading scholarship on children's and young adult literature from three intersecting disciplines Education English and Library and Information Science Distinguished by its multidisciplinary approach it describes and analyzes the different aspects of literary reading texts and contexts to illuminate how the book is transformed within and across different academic figurations of reading and interpreting children's literature Part one considers perspectives on readers and reading literature in home school library and community settings Part two introduces analytic frames for studying young adult novels picturebooks indigenous literature graphic novels and other genres Chapters include commentary on literary experiences and creative production from renowned authors and illustrators Part three focuses on the social contexts of literary study with chapters on censorship awards marketing and literary museums The

singular contribution of this Handbook is to lay the groundwork for colleagues across disciplines to redraw the map of their separately figured worlds thus to enlarge the scope of scholarship and dialogue as well as push ahead into uncharted territory
