*LITTLE RIVER: A place for beginnings and of things to remember* Dadfire, 2020-12-02 Little River is a coming-of-age story about a young boy called Bean and his little brother Jack. It takes place in the sixties in a small rural community set among the gleaming white cotton fields of northeast Arkansas. The story begins with the two young lads' obvious isolation from the world outside as they learn to create their own adventures in the only place they really know: their farm. The boys' desire to have a close relationship with their dad is hindered by his demanding job of overseeing the sharecroppers. The patient Mom is a comforting force taking care of the family while being trapped in her own isolated world. When family tensions mount as the surrounding farms begin to fail, the father takes a downward spiral path of turning to alcohol. Losing his job and with the family to the breaking point, they move close by to Little River with hope of a new start in town. There Bean discovers a whole new world with new friends. Forming an adventurous band of misfits, they build a magnificent treehouse while the family's struggles worsen. As a bright future begins to fade, the dusty trail of failure slowly catches up. Doubts, rumors, and unbearable tragedy ensue, but the strong bonds of family love and friendship give them the means to survive. They become a shining example of overcoming life's most arduous hardships.

**Doing without Concepts** Edouard Machery, 2009-02-27 Over recent years, the psychology of concepts has been rejuvenated by new work on prototypes, inventive ideas on causal cognition, the development of neo-empiricist theories of concepts, and the inputs of the budding neuropsychology of concepts. But our empirical knowledge about concepts has yet to be organized in a coherent framework. In *Doing without Concepts*, Edouard Machery argues that the dominant psychological theories of concepts fail to provide such a framework and that drastic conceptual changes are required to make sense of the research on concepts in psychology and neuropsychology. Machery shows that the class of concepts divides into several distinct kinds that have little in common with one another and that for this very reason it is a mistake to attempt to encompass all known phenomena within a single theory of concepts. In brief, concepts are not a natural kind. Machery concludes that the theoretical notion of concept should be eliminated from the theoretical apparatus of contemporary psychology and should be replaced with theoretical notions that are more appropriate for fulfilling psychologists' goals. The notion of concept has encouraged psychologists to believe that a single theory of concepts could be developed, leading to useless theoretical controversies between the dominant paradigms of concepts. Keeping this notion would slow down and maybe prevent the development of a more adequate classification and would overshadow the theoretical and empirical issues that are raised by this more adequate classification. Anyone interested
