Archaeological Department. Southern Circle, Madras, 1921 A Welsh Landscape through Time Jane Kenney, 2021-08-31

Holy Island is a small island just off the west coast of Anglesey North Wales which is rich in archaeology of all periods Between 2006 and 2010 archaeological excavations in advance of a major Welsh Government development site Parc Cybi enabled extensive study of the island's past Over 20 hectares were investigated revealing a busy and complex archaeological landscape which could be seen evolving from the Mesolithic period through to the present day Major sites discovered include an Early Neolithic timber hall aligned on an adjacent chambered tomb and an Iron Age settlement the development of which is traced by extensive dating and Bayesian analysis A Bronze Age ceremonial complex along with the Neolithic tomb defined the cultural landscape for subsequent periods A long cist cemetery of a type common on Anglesey proved uncommonly to be late Roman in date while elusive Early Medieval settlement was indicated by corn dryers This wealth of new information has revolutionised our understanding of how people have lived in and transformed the landscape of Holy Island Many of the sites are also significant in a broader Welsh context and inform the understanding of similar sites across Britain and Ireland

**Moel-y-Gaer (Bodfari): A Small Hillfort in Denbighshire, North Wales** Gary Lock, 2022-07-26 Moel y Gaer Bodfari is the northernmost of a series of hillforts atop the Clwydian hills in Wales Nine seasons of survey and excavation reveal details of Moel y Gaer's ramparts entrances and interior Discussion situates the site within the later prehistoric settlement record for north eastern Wales paying particular attention to hillforts **The Development of Neolithic House Societies in Orkney** Colin Richards, Richard Jones, 2016-04-30 Considering that Orkney is a group of relatively small islands lying off the northeast coast of the Scottish mainland its wealth of Neolithic archaeology is truly extraordinary An assortment of houses chambered cairns stone circles standing stones and passage graves provides an unusually comprehensive range of archaeological and architectural contexts Yet in the early 1990s there was a noticeable imbalance between 4th and 3rd millennium cal BC evidence with house structures and villages being well represented in the latter but minimally in the former As elsewhere in the British Isles the archaeological visibility of the 4th millennium cal BC in Orkney tends to be dominated by the monumental presence of chambered cairns or tombs In the 1970s Claude Lévi Strauss conceived of a form of social organization based upon the house societies' maisons in order to provide a classification for social groups that appeared not to conform to established anthropological kinship structures In this approach the anchor point is the house

understood as a conceptual resource that is a consequence of a strategy of constructing and legitimizing identities under ever shifting social conditions Drawing on the results of an extensive program of fieldwork in the Bay of Firth Mainland Orkney the text explores the idea that the physical appearance of the house is a potent resource for materializing the dichotomous alliance and descent principles apparent in the archaeological evidence for the early and later Neolithic of Orkney It argues that some of the insights made by L vi Strauss in his basic formulation of soci t s maisons are extremely relevant to interpreting the archaeological evidence and providing the parameters for a social narrative of the material changes occurring in Orkney between the 4th and 2nd millennia cal BC The major excavations undertaken during the Cuween Wideford Landscape Project provided an unprecedented depth and variety of evidence for Neolithic occupation bridging the gap between domestic and ceremonial architecture and form exploring the transition from wood to stone and relationships between the living and the dead and the role of material culture The results are described and discussed in detail here enabling tracing of the development and fragmentation of soci t s maisons over a 1500 year period of Northern Isles prehistory

Villa Landscapes in the Roman North Ton Derks,Nico Roymans,2025-10-01 This edited volume presents a synthesis of recent research on villas and villa landscapes in the northern provinces of the Roman world It offers an original multi dimensional perspective on the social economic and cultural functioning of villas within the context of the Roman empire Themes discussed include the economic basis of villa dominated landscapes rural slavery town country dynamics the role of monumental burials in villa landscapes and self representation and lifestyle of villa owners This study offers a major contribution to the comparative research of villa landscapes and the phenomenon of regionality in Roman rural landscapes

Amsterdam Archaeological Studies is a series devoted to the study of past human societies from the prehistory up into modern times primarily based on the study of archaeological remains The series will include excavation reports of modern fieldwork studies of categories of material culture and synthesising studies with broader images of past societies thereby contributing to the theoretical and methodological debates in archaeology
