Stone Vessels Of The Cyclades In The Early Bronze Age:

Stone Vessels of the Cyclades in the Early Bronze Age Pat Getz-Gentle, 1996 With the exception of early Egypt and Minoan Crete no early culture had such a vigorous stone vase making industry as the Cyclades Figures and vessels of stone overwhelmingly of marble are the most distinctive and appealing products of the Early Cycladic culture The vessels like the better known figures formed a special class of object that conformed to a strict traditional typology Ranging from charming miniatures to works of impressive size they often show a striking purity of form beauty of material and excellence in their workmanship *Stone Vessels of the Cyclades in the Early Bronze Age* is the first comprehensive study of these vessels For each vessel type Pat Getz Gentle considers the material used the size range and the formal characteristics and the extent of their variation She also discusses manufacturing methods the incidence of repairs occasioned by accidental damage and the possible function or functions as well as the development frequency dating and distribution of each vessel type within the Cyclades and beyond She stresses the human element how the vessels were used held and carried how much they weigh and how much they hold She examines the sculptors who made them how they might have designed and executed their works how on occasion they seem to have modified their original plans and how they stand out as individual artists working within a traditional craft The 114 plates with more than 500 separate photographs illustrate works that show both the homogeneity and the diversity within each type

The Early Bronze Age Village on Tsoungiza Hill Daniel J. Pullen, 2011-12-31 While corridor houses such as the House of the Tiles at Lerna have provoked widespread discussion about the origins of social stratification in Greece few settlements of the Early Bronze Age ca 3100 to 2000 B C have been thoroughly excavated This important study integrates the presentation and analysis of the archaeological evidence from a single settlement that flourished on Tsoungiza Hill in the Nemea Valley from the Final Neolithic until the end of the Early Helladic period The first section details the stratigraphy architecture deposits and ceramics of each of the five major periods represented The second section contains specialist reports on all aspects of material culture including figurines and ornaments textiles and crafts metal analyses chipped and ground stone and faunal and palaeobotanical remains

Early Cycladic Sculpture in Context

Marisa Marthari, Colin Renfrew, Michael J. Boyd, 2017-01-04 The sculpture of the early bronze age Cyclades has been systematically studied since the time of Christos Tsountas at the end of the 19th century But that study has been hampered by the circumstance that so many of the subsequent finds come from unauthorized excavations where the archaeological context was irretrievably lost Largely for that reason there are still many problems surrounding the chronology the function and the meaning of Early Cycladic sculpture This lavishly illustrated and comprehensive reassessment sets out to rectify that situation by publishing finds which have been recovered in controlled excavations in recent years as well as earlier finds for which better documentation can now be provided Using the material from recent excavation projects and drawing on the papers presented at a symposium held in Athens in 2014 it is possible now to undertake a fresh overview of the entire body of

sculpture from the Cycladic islands which has been found in secure archaeological contexts Beginning with early examples from Neolithic settlement sites and extending into a consideration of material found in later contexts the 35 chapters are divided into sections which examine sculpture from settlements cemeteries and the sanctuary at Kavos concluding with a discussion of material techniques and aspects of manufacture *Kos in the Neolithic and Early Bronze Age* Mercourios Georgiadis,2012-12-31 This volume is based on material from an intensive and systematic field survey of Halasarna modern Kardamaina located on a coastal plain in the southern part of the Dodecanesian island of Kos and a study of settlement patterns across the Aegean It provides a new corpus of data on the Neolithic and Early Bronze Age periods presents a material sequence based on stylistic analysis and develops a diachronic understanding of settlement dynamics within a wider regional context **The ^A Oxford Handbook of the Bronze Age Aegean** Eric H. Cline,2012-01-01 The Oxford Handbook of the Bronze Age Aegean provides a comprehensive overview of our current understanding of the Bronze Age Aegean ca 3000 1000 BCE and describes the most important debates and discussions within the discipline Presented in four separate sections within the Handbook the sixty six commissioned articles cover topics ranging from chronological and geographical to thematic to site specific The volume will be indispensable for scholars and advanced students alike *Early Cycladic Sculpture* Pat Getz-Preziosi,1995-01-12 First published in 1985 this ground breaking book surveys the development of Cycladic sculpture produced by unidentified artists who worked in the Aegean islands forty five hundred years ago Illustrated with numerous objects from American collections with particular emphasis on some two dozen pieces in the Getty Museum this volume surveys the typological development of Early Cycladic sculpture and identifies where possible the work of individual sculptors Newly revised and updated this book is a concise introduction to the field *The Cambridge Companion to the Aegean Bronze Age* Cynthia W. Shelmerdine,2008-08-04 This book is a comprehensive up to date survey of the Aegean Bronze Age from its beginnings to the period following the collapse of the Mycenaean palace system In essays by leading authorities commissioned especially for this volume it covers the history and the material culture of Crete Greece and the Aegean Islands from c 3000 1100 BCE as well as topics such as trade religions and economic administration Intended as a reliable readable introduction for university students it will also be useful to scholars in related fields within and outside classics The contents of this book are arranged chronologically and geographically facilitating comparison between the different cultures Within this framework the cultures of the Aegean Bronze Age are assessed thematically and combine both material culture and social history **Personal Styles in Early Cycladic Sculpture** Pat Getz-Gentle,Jack de Vries,2001 Annotation Personal Styles in Early Cycladic Sculpture represents the culmination of thirty five years of study Pat Getz Gentle offers here much new material and many fresh insights into a tradition rooted in the Neolithic period that spanned most of the third millennium B C She begins with a review of this tradition placing particular emphasis on the stages leading to the reclining figure with folded arms that is the unique and quintessential icon of the early Bronze Age culture at the

center of the Aegean She then focuses on the styles of fifteen sculptors several of whom are identified and discussed for the first time in this volume By introducing little known pieces attributable to these sculptors she illuminates various phases of their artistic development BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

discoveries The Early Minoan I tombs at Hagia Photia included the largest assemblage of vessels in Cycladic style known from Crete as well as vases from production workshops in Crete The pottery is extremely important for several reasons including the definition of the EM I ceramic styles that were being used as funerary offerings in this part of Crete the establishment of the chronological synchronisms between Crete and the Cyclades and information on the history of the Minoan pottery industry When compared with other deposits from EM I Crete the pottery helps to establish a better understanding of the ceramic development within the first Minoan time period
