Stonehenge Making Space:

Stonehenge Barbara Bender, 1998-04 Unique in its approach this book offers a systematic account of the ways in which through time the Stonehenge landscape has been used and re used invested with new meanings and has given rise to stories

Stonehenge Barbara Bender, 1998 This book is an imaginative exploration of a place that has fascinated intrigued and perplexed visitors for centuries Instead of seeing Stonehenge as an isolated site the author sets the stones within a wider landscape and explores how use and meaning have changed from prehistoric times right through to the present Throughout the millennia the Stonehenge landscape has been used and re used invested with new meanings and has given rise to myths and stories The author creatively explores how the landscape has been appropriated and contested and invokes the debates and experiences of people who have very different and often conflicting experiences of the same place Today heritage managers archaeologists local people free festivallers and druids come to the place with entirely different understandings and agendas The book demonstrates that the creation of spaces and places for people to express divergent viewpoints is powerfully constrained by social and political forces that allow some voices to be heard while others are marginalized With dialogues and illustrations that range from the conventional to the cartoon strip this multi vocal book not only presents a wide range of views in an innovative way but provides important new insights on how people shape and are shaped by landscape

Bounded Wilderness Kathryn Jasper, 2024-10-15 In *Bounded Wilderness* Kathryn Jasper focuses on the innovations undertaken at the hermitage of Fonte Avellana in central Italy during the eleventh century by its prior Peter Damian d 1072 The congregation of Fonte Avellana experimented with reforming practices that led to new ways of managing property and relations among clergy nobles and the laity Jasper charts how Damian s notion of monastic reform took advantage of the surrounding topography and geography to amplify the sensory aspects of ascetic experiences By focusing on monastic landscapes and land ownership Jasper demonstrates that reform extended beyond abstract ideas Rather reform circulated locally through monastic networks and addressed practical concerns such as property boundaries and rights over water orchards pastures and mills Putting new sources both documentary and archaeological into conversation with monastic charters and Damian s letters *Bounded Wilderness* reveals the interrelationship of economic practices religious traditions and the natural environment in the idea and implementation of reform

Tourism, Consumption and Representation Kevin Meethan, Alison Anderson, Steven Miles, 2006 This book addresses the practices of consumption in tourism a major theme in the sociology of tourism To date most tourism analysis has tended to concentrate on the production of tourist space and assume that tourism consumption simply mirrors the intentions of the producers By focussing on a number of relevant sub themes such as age gender religion and sexual orientation the chapters within this book critically examine such assumptions in terms of the interplay between the production and consumption of tourist spaces and how patterns of tourism consumption are negotiated on an individual level
