Stones 18 Th Century Scottish Gravestones:

Mortuary Monuments and Burial Grounds of the Historic Period Harold Mytum, 2012-12-06 Burial grounds strike an immediate chord with all who visit them They are land scapes full of pathos and cultural associations which many find attractive though a minority feel are too morbid to deserve detailed attention This book is designed to offer a framework for studying historic burial ground monuments and contains a certain amount of information regarding below ground archaeology as some projects will involve the study of both Moreover from a research perspective above and below ground archaeology together can throw considerable light on the process of dying body disposal and commemoration that formed a continuum for those involved However the more easily accessible graveyard memorials can be used to study many aspects of past culture beyond that directly associated with death and they are the focus of the book Most people who become interested in historic graveyard memorials come to the subject via the material itself Only rarely does a research question get posed and graveyard data seem like an appropriate arena for investigation This has the advantage that many researchers have some ideas about the data available but the disadvantage that they may not have clear questions to ask of it nor how to set their discoveries in a wider intellectual context *Ethnicity and the American Cemetery* Richard E. Meyer, 1993

Contributing authors illustrate the book s interdisciplinary focus with representation from among others the fields of folklore cultural history historical archeology landscape architecture and philosophy heavily illustrated the volume also features an introductory essay by editor Richard E Meyer and an extensive annotated bibliography **Stones** Betty Willsher, Doreen M. Hunter, 1979

among its most historic peaceful and magical places They are also among its most overlooked This book will open readers eyes to the treasures to be found up and down the land [Historic Gravestone Art of Charleston, South Carolina, 1695-1802](#) David R. Mould, Missy Loewe, 2015-02-18 Here lyes Buried the Body of MARTHA PERONNEAU Departed This Life December Ye 14th 1746 Aged 13 Years Such an inscription was typical of 18th century grave markers in Charleston South Carolina

Many epitaphs went on to reveal much more about the deceased personality religious beliefs career accomplishments and social position Attention to social matters was a natural part of life in Charleston where descendants of the city's 17th century British founders sought to recreate the class conscious culture of aristocratic England The merging of this culture with influences from French Huguenots German Lutherans Scottish Presbyterians and Spanish Jews led to funeral practices unique in the American colonies Focusing on pieces created between 1695 and 1802 this volume offers a detailed examination of the tombstones and grave markers from 18th century Charleston It discusses not only the general trends and the symbolism of the period's gravestone art such as skulls portraits ascending souls and stylized vegetation but also examines specific instances of these popular motifs Tombstones from Charleston's oldest and most significant churches including the Circular Congregational Church St Philip's Anglican Church the French Huguenot Church and the First Scots Presbyterian Church are explored in detail The work looks at how Charleston gravestones differed from funerary art elsewhere in the American colonies and reveals them to be some of the earliest examples of American sculpture A guide to colonial gravestone symbols and a glossary of relevant Latin terms are also included *The Archaeology of Industrialization: Society of Post-Medieval Archaeology Monographs: v. 2* David Barker, 2020-08-26 This book is the outcome of the first joint conference of the two country's foremost societies devoted to the archaeological study of the early modern and modern worlds It discusses the progress of industrialization and its impact upon modern society *In Search of Gravestones Old and Curious* W. Irish Studies Marti D. Lee, Ed Madden, 2009-10-02 Highlighting the work of both established and emerging scholars in Irish studies this collection brings together fifteen essays working at the intersection of two important and developing fields of Irish studies gender studies and cultural geography Developed from papers first presented at a regional meeting of the American Conference for Irish Studies in South Carolina in 2006 not only does this work suggest the importance of linking gender and geography but it also suggests in the range of literary and historical topics the rich interdisciplinary nature of Irish studies at present Central to all of the essays is an attention to intersections of gender and sexual identity formation with the politics of place and space Although considerations of geographic space have long been staples of Irish cultural studies especially in relation to political identities these pieces suggest the critical importance of linking spatial and
