A Cultural History of Marriage in the Age of Enlightenment Edward Behrend-Martínez,2021-11-18 Could an institution as sacred and traditional as marriage undergo a revolution Some people living during the so called Age of Enlightenment thought so By marrying for that selfish personal emotion of love rather than to serve religious or family interests to serve political demands or the demands of the pocketbook a few but growing number of people revolutionized matrimony around the end of the eighteenth century Marriage went from being a sacred state instituted by the Church and involving everyone to for a few intrepid people a secular contract a deal struck between two individuals based entirely on their mutual love and affection Few would claim today that love is not the cornerstone of modern marriage The easiest argument in favor of any marriage today no matter how star crossed the individuals is that the couple is deeply and hopelessly in love with one another But that was not always so clear Before the eighteenth century very few couples united simply because they shared a mutual attraction and affection for one another Yet only a century later most people would come to believe that mutual love and even attraction were necessary for any marriage to succeed A Cultural History of Marriage in the Age of Enlightenment explores the ways that new ideas cultural ideals and economic changes big and small reshaped matrimony into the institution that it is today allowing love to become the ultimate essential ingredient for modern

History of Iranian Literature J. Rypka,2013-11-11 Some justification seems to be necessary for the addition of yet another History of Iranian Literature to the number of those already in existence Such a work must obviously contain as many novel features as possible so that a short explanation of what my collaborators and I had in mind when planning the book is perhaps not superfluous In the first place our object was to present a short summary of the material in all its aspects and secondly to review the subject from the chronological geo graphical and substantial standpoints all within the compass of a single volume Such a scheme precludes a formal and complete enumeration of names and phenom ena and renders all the greater the obligation to accord most prominence to matters deemed to be of greatest importance supplementing these with such figures and forms as will enable an impression to be gained of the period in question all this is far as possible in the light of the most recent discoveries A glance at the table of contents will suffice to give an idea of the multifarious approach that has been our aim We begin at the very first traces of evidence bearing on our subject and continue the narrative up to the present day Geographically the book embraces Iran and its neighbouring countries while it should be remarked that Iranian literature in its fullest sense also includes Indo Persian and Judeo Persian works
