*Handbook of Research on Children's and Young Adult Literature* Shelby Wolf, Karen Coats, Patricia Enciso, Christine Jenkins, 2011-04-27 This landmark volume is the first to bring together leading scholarship on children s and young adult literature from three intersecting disciplines Education English and Library and Information Science Distinguished by its multidisciplinary approach it describes and analyzes the different aspects of literary reading texts and contexts to illuminate how the book is transformed within and across different academic figurations of reading and interpreting children s literature Part one considers perspectives on readers and reading literature in home school library and community settings Part two introduces analytic frames for studying young adult novels picturebooks indigenous literature graphic novels and other genres Chapters include commentary on literary experiences and creative production from renowned authors and illustrators Part three focuses on the social contexts of literary study with chapters on censorship awards marketing and literary museums The singular contribution of this Handbook is to lay the groundwork for colleagues across disciplines to redraw the map of their separately figured worlds thus to enlarge the scope of scholarship and dialogue as well as push ahead into uncharted territory     **Just So Stories for Little Children** Anna Milbourne, Rob Lloyd Jones, Rosie Dickins, 2021-11-25     *Real Kids* Susan Engel, 2005-10-03 Decades of work in psychology labs have vastly enhanced our knowledge about how children perceive think and reason But it has also encouraged a distorted view of children argues psychologist Susan Engel in this provocative and passionate book a view that has affected every parent who has tried to

debate with a six year old By focusing on the thinking processes prized by adults too many expert opinions have rendered children as little adults What has been lost is what is truly unique and mysterious the childlike quality of a child s mind Engel draws on keen observations and descriptive research to take us into the nearly forgotten untidy phantasmagorical world of children s inner lives She reminds us that children fuse thought and emotion play and reality they swing wildly between different ways of interpreting and acting in the world But just as a gawky child may grow into a beauty illogical and sometimes maddening childishness can foreshadow great adult ability Engel argues that the scientist in a crib view encourages parents and teachers to expect more logical reasoning and emotional self control from children than they possess She provides a concise and valuable overview of what modern developmental psychologists have learned about children s developing powers of perception and capacity for reasoning but also suggests new ways of studying children that better capture the truth about their young minds
