Subjective Understanding Computer Models Of Belief Systems Computer Science:

Subjective Understanding Jaime Guillermo Carbonell, YALE UNIV NEW HAVEN CONN DEPT OF COMPUTER SCIENCE., 1979 Modeling human understanding of natural language requires a model of the processes underlying human thought No two people think exactly alike different people subscribe to different beliefs and are motivated by different goals in their activities A theory of subjective understanding has been proposed to account for subjectively motivated human thinking ranging from ideological belief to human discourse and personality traits A process model embodying this theory has been implemented in a computer system POLITICS POLITICS models human ideological reasoning in understanding the natural language text of international political events POLITICS can model either liberal or conservative ideologies Each ideology produces a different interpretation of the input event POLITICS demonstrates its understanding by answering questions in natural language question answer dialogs *Inside Computer Understanding* R. C. Schank, C. K. Riesbeck, 2013-10-28 First published in 1981 This book has been written for those who want to comprehend how a large natural language understanding program works Thirty five professionals in Cognitive Science mostly psychologists by training in a summer school were taught to grapple with the details of programming in Artificial Intelligence As a part of the curriculum designed for this project the authors created what they called micro programs These micro programs were an attempt to give students the flavor of using a large AI program without all the difficulty normally associated with learning a complex system written by another person Using the authors parser ELI or story understanding program SAM they also gave students the micro versions of these programs which were very simple versions that operated in roughly the same way as their larger versions but without all the frills Students were asked to add pieces to the programs and otherwise modify them in order to learn how they worked **Explanation Patterns** Roger C. Schank, 1986 First Published in 1986 Routledge is an imprint of Taylor Francis an informa company **Explanation Patterns** R. P. Schank, 2013-08-21 First Published in 1986 In the age of the computer conjecture about things mechanical has naturally led to the question of whether machines can think As the emphasis on Artificial Intelligence AI has grown rapidly questions about machine intelligence have begun to have a certain urgency The question we are concerned with in this book is If we can find a set of processes that machines can slavishly follow and if by so doing these machines can come up with creative thoughts what would that tell us about human beings If the machine s procedure was adapted from a human procedure that is if all the machine was doing was what we know people are doing would we abandon our inherent skepticism about the abilities of machines or would we demystify our inherent admiration for things human In a sense these are the issues dealt with in this book The author says in a sense because this book is no way a philosophical treatise Rather it is an exercise in Artificial Intelligence and in Cognitive Science it is an attempt to come to understand one of the most complex problems of mind by examining some of the mechanisms of mind to define the apparatus that underlies our ability to think **Understanding Editorial Text: A Computer Model of**

Argument Comprehension Sergio J. Alvarado, 2012-12-06 by Michael G Dyer Natural language processing NLP is an area of research within Artificial Intelligence AI concerned with the comprehension and generation of natural language text Comprehension involves the dynamic construction of conceptual representations linked by causal relationships and organized indexed for subsequent retrieval Once these conceptual representations have been created comprehension can be tested by means of such tasks as paraphrasing question answering and summarization Higher level cognitive tasks are also modeled within the NLP paradigm and include translation acquisition of word meanings and concepts through reading analysis of goals and plans in multi agent environments e g coalition and counterplanning behavior by narrative characters invention of novel stories recognition of abstract themes such as irony and hypocrisy extraction of the moral or point of a story and justification refutation of beliefs through argumentation The robustness of conceptually based text comprehension systems is directly related to the nature and scope of the knowledge constructs applied during conceptual analysis of the text Until recently conceptually based natural language systems were developed for and applied to the task of narrative comprehension Dyer 1983a Schank and Abelson 1977 Wilensky 1983 These systems worked by recognizing the goals and plans of narrative characters and using this knowledge to build a conceptual representation of the narrative xx UNDERSTANDING EDITORIAL TEXT including actions and intentions which must be inferred to complete the representation A large portion of text appearing in newspapers and magazines however is editorial in nature

Narrative Intelligence Michael Mateas, Phoebe Sengers, 2003-02-27 Narrative Intelligence NI the confluence of narrative Artificial Intelligence and media studies studies models and supports the human use of narrative to understand the world This volume brings together established work and founding documents in Narrative Intelligence to form a common reference point for NI researchers providing perspectives from computational linguistics agent research psychology ethology art and media theory It describes artificial agents with narratively structured behavior agents that take part in stories and tours systems that automatically generate stories dramas and documentaries and systems that support people telling their own stories It looks at how people use stories the features of narrative that play a role in how people understand the world and how human narrative ability may have evolved It addresses meta issues in NI the history of the field the stories AI researchers tell about their research and the effects those stories have on the things they discover Series B

Metaphors of Mind Robert J. Sternberg, 1990-07-27 Metaphors of Mind seeks to help readers understand human intelligence as viewed from a variety of standpoints such as those of psychology anthropology computational science sociology and philosophy Much of the present confusion surrounding the concept of intelligence stems from our having looked at it from these different standpoints without considering how they relate to each other or how they might be combined into a unified view that goes beyond the boundaries of a particular discipline Readers of Metaphors of Mind will come away with a comprehensive understanding of the concept of intelligence and how ideas about it have evolved and are continuing to evolve

Affect and Cognition Margaret S. Clark, Susan T. Fiske, 2014-01-14

First published in 1982 In late May 1981 the 17th annual Carnegie Symposium on Cognition brought 16 cognitive and social psychologists to Carnegie Mellon University Their topic was affect and cognition For only the second time the Carnegie Symposium had been organized by social psychologists John Carroll and John Payne chaired the first social cognitive symposium in 1975 Their conference came precisely at the time when social cognition was beginning to take root within social psychology Since then the area has blossomed These are the papers from the conference **Machine Learning**
Ryszard Stanisław Michalski,Jaime G. Carbonell,Tom M. Mitchell,1983 *Strategies for Natural Language Processing* W. G. Lehnert,M. H. Ringle,2014-04-04 First published in 1982 Simply defined the field of natural language processing is concerned with theories and techniques that address the problem of natural language communication with computers One of the goals of this research is to design computer programs that will allow people to interact with computers in natural conversational dialogues
