Subs Against The Rising Sun Us Submarines In The Pacific:

Subs Against the Rising Sun Keith M. Milton, 2000 A comprehensive rendering of submarine warfare chronicles for actions during World War II includes photos on each of the 249 submarines Cover **Atrocity, Deviance, and Submarine Warfare** Nachman Ben-Yehuda, 2013-07-15 In an era of changing ethics the submarine has inaugurated a new type of unrestricted naval warfare **Japanese Military Strategy in the Pacific War** James B Wood, 2023-06-14 In this provocative history James B Wood challenges the received wisdom that Japan's defeat in the Pacific was historically inevitable He argues instead that it was only when the Japanese military prematurely abandoned its original sound strategic plan to secure the resources Japan needed and establish a viable defensible perimeter for the Empire that the Allies were able to regain the initiative and lock Japanese forces into a war of attrition they were not prepared to fight The book persuasively shows how the Japanese army and navy had both the opportunity and the capability to have fought a different and more successful war in the Pacific that could have influenced the course and outcome of World War II It is therefore a study both of Japanese defeat and of what was needed to achieve a potential Japanese victory or at the very least to avoid total ruin Wood's argument does not depend on signal individual historical events or dramatic accidents Instead it examines how familiar events could have been **The Development of Mine Warfare** Norman E. Youngblood, 2006-06-30 In 1997 the International Campaign to Ban Landmines ICBL coordinated the Convention on the Prohibition of the Use Stockpiling Production and Transfer of Anti Personnel Mines and on their Destruction As of mid 2005 145 states had signed the agreement The ICBL's efforts were in large part a response to the careless use of landmines in the previous fifty years The history of mine use in warfare however goes back much further than the World Wars of the 20th century and includes both land and sea use This first comprehensive study traces the technical tactical and ethical developments of mine warfare from ancient times to the present Beginning with mine warfare's roots in ancient Assyria and China Youngblood takes the reader through the centuries of debate about how these hidden weapons should be used A look at 19th century developments explores the intertwined development of land and sea mines and the inventors behind them including Robert Fulton Samuel Colt and Immanuel Nobel father of Alfred Nobel Subsequent chapters examine the use of mines in the American Civil War the Russo Japanese War both World Wars and the battlefields of the Cold War and chart key battles and technical innovations such as the development of air delivered munitions Finally the author addresses the ethical concerns raised by the careless mining namely the impact on civilians and the difficulties of de-mining and the treaties that regulate landmine use **The Submariner's Dictionary Or Submariner's Compendium of Terms & Tar's Handbook of Naval Verbiage and Retired Guy's Re-familiarization Manual** Ron Martini, 2005 Submariners are a tight knit group of men bound together by training and experience and with a language all their own That language is perhaps a little vulgar but never intentionally demeaning and a little irreverent but still worldly This work is an attempt to preserve and explain some of these curious guys

who so proudly wear a shiny metal pin that looks like a strange pair of fish on their left breast This process of accumulating this new language begins in Boot Camp and is added to with every change of duty station the sailor undergoes It is heard aboard the boats and unknowingly by family members who can't understand terms like head deck and overhead and who think SOS is a distress signal

Secret Fleets Lynne Cairns,2011-09-01 Contrary to what many Australians believe during 1942 Japanese submarines were active in Australian waters and Japanese spy planes made surveillance flights over our major cities With enemy submarines patrolling off the Western Australian coast Fremantle became an important international submarine base the largest in the Southern Hemisphere During the war Fremantle played host to over 170 Allied submarines with submarines of the United States British and Dutch navies making a total of 416 war patrols out of the port between March 1942 and August 1945 The secrecy surrounding the operation of the Fremantle submarine base meant that its existence was little known at the time and until now has been largely forgotten by history

Sink ÕEm All: Submarine Warfare in the Pacific Charles A. Lockwood,2017-11-27 Sink Em All by Vice Admiral Charles A Lockwood the U S Navy commander of the Pacific submarine fleet during World War 2 is the exhaustive and definitive account of submarine warfare between the US and Japanese 1942-45 Lockwood's intricate narrative is the breathless story of every submarine in the US fleet and what they did during the war their misses near misses and hits He takes us into the cramped quarters of mess halls and control rooms and brings the chief actors in the grueling conflict to life

The USS Flier Michael Sturma,2008-02-15 The realities of WWII underwater warfare come to life in this chronicle of a submarine sunk in the Philippines and the remarkable sailors who survived The fate of the USS Flier is one of the most astonishing stories of the Second World War On August 13 1944 the submarine struck a mine and sank to the bottom of the Sulu Sea in less than one minute leaving only fourteen of its crew of eighty-six hands alive After enduring eighteen hours in the water eight remaining survivors swam to a remote island controlled by the Japanese Deep behind enemy lines and without food or drinking water the crewmen realized that their struggle for survival had just begun

Those eight sailors became the first Americans of the Pacific war to escape from a sunken submarine and return safely to the United States. Their story of persistence and survival has all the elements of a classic World War II tale: sudden disaster, physical deprivation, a ruthless enemy, and a dramatic escape from behind enemy lines. In *The USS Flier*, noted historian Michael Sturma vividly recounts a harrowing story of brave men who lived to return to the service of their country.

Operation Rising Sun David W. Jourdan, James P. Delgado, 2020-06-01 In 1944 Allied codebreakers learned the Imperial Japanese Navy had dispatched the cargo submarine I-52 to occupied France with tons of military supplies and payment in gold for German assistance. I-52 undertook the mission as part of the Yanagi missions, a military program meant to alleviate Japan's desperate need for military material and technical knowledge. After tracking I-52 from Asia to the Atlantic, the Allies destroyed the vessel in a battle that ended the Yanagi missions and left I-52 an unlikely treasure ship on the seafloor. David W. Jourdan adds to the history of I-52 with a spellbinding account of his efforts to find the sunken submarine. One of the first joint American-Russian research expeditions, the search for the wreck combined a team effort, exhaustive detective work, and a dramatic battle with the sea. The effort paid off when the group found I-52's nearly intact hull three miles down. The expedition also earned an unexpected historical dividend when it uncovered one of a kind recording of an American Avenger torpedo bomber attack on an enemy submarine. Part war tale and part seagoing adventure, *Operation Rising Sun* tells the story of the two very different missions to find submarine I-52.
