## Structural-Functionalist Perspective

- Drug abuse is a response to weakening of societal norms (**anomie**).
- Drug use is a response to the absence of a perceived bond between the individual and society.
- Consistent with this perspective, a recent study on attitudes and drug use concluded that the dramatic increase in teenage use of prescription drugs is, in part, the result of:
  - Lax attitudes and beliefs of parents and caregivers
  - Parents not effectively communicating the dangers
  - Parents not safeguarding the prescriptions at home
