The Models Of Project Link

Shinichi Ichimura, Mitsuo Ezaki

The Models Of Project Link:

Econometric Models of Asian Link Shinichi Ichimura, Mitsuo Ezaki, 2012-12-06 This is the first outcome of our effort in ASIAN LINK PROJECT to construct the econometric models of Asian developing countries and analyze their inter dependence with major trading partners the United States and Japan The model we present here is called Asian Link System The countries in this system include Korea Taiwan Hong Kong China the Philippines Thailand Malaysia Singapore Indonesia Japan and the United States They are covered by national models The rest of the world is divided into several regions and treated by simple proto type models The main characteristics of Asian Link System are to deal with the inter dependent relations between Asian developing countries on the one hand and Japan and United States on the other hand Here are presented these national models and the Asian Link System with the underlying statistical data so that any econometrician can re estimate our models and check the results of our research work Nowadays most articles and books in econometrics report only the final results or conclusions of research so that no other econometrician can re calculate or re examine the findings This is very serious in the empirical research because as theorists may make mistakes positive economists do commit errors or miss some possible considerations Unless statistical data are offered other econometricians cannot make suggestions or improve the models This is the main reason why empirical research in econometrics or applied econometrics are not making substantial progress in recent years *Global International Economic Models* B.G. Hickman, 2014-06-28 This volume surveys the state of the art of global international modeling All 15 models included in the survey feature national or regional disaggregation of the world economy and interdependencies among the various nations and regions A few are constructed for short term forecasting but the primary focus is on long run models and applications Macroeconomic input output general equilibrium trade and exchange rate and several hybrid models are included A cross sectional analysis by the editor compares the structures linkage mechanisms methodologies and applications of the various models and concludes with some observations on prospective research trends Macroeconometric Models Władysław Welfe, 2013-02-15 This book gives a comprehensive description of macroeconometric modeling and its development over time The first part depicts the history of macroeconometric model building starting with Jan Tinbergen's and Lawrence R Klein's contributions It is unique in summarizing the development and specific structure of macroeconometric models built in North America Europe and various other parts of the world The work thus offers an extensive source for researchers in the field The second part of the book covers the systematic characteristics of macroeconometric models It includes the household and enterprise sectors disequilibria financial flows and money market sectors *Modelling Europe* Antonella Rancan, Francesco Sergi, 2024-08-20 What was the role of economists and economics in the making of the European Union This book sheds light on the activities of a particular type of economic experts the macroeconomic modellers of the Directorate General for Economic and Financial Affairs DG II who built multi country macroeconomic models of the European Economic Community These models aim at

studying the macroeconomic interactions between national economies and at providing insights about the effects of coordinating or not national economic policies The book documents the origins challenges and progress made by DG II s experts through building these models This book provides insight into the influence of multi country models on modern economics It will be relevant to students and researchers interested in the history of economic thought and the development of macroeconomic policy **Conference on Pacific Area Economic Models of Project LINK, July 11-12, 1983**, 1983

Theory and Practice of International Trade Linkage Models A. Italianer, 2012-12-06 This book was mainly written while I stayed at the Catholic University of Louvain Professor Anton P Barten was the one who did not only give me a warm welcome in Louvain but also supported my research with most valuable comments and constructive criticisms In addition I benefitted from discussions with Erik Schokkaert Denis de Crombrughe and Jo Baras on various subjects such as the small sample correction of Chapter 9 The arduous task of transferring my neat handwriting into a readable typescript was excellently taken care of by Brs E Crabbe and notably Brs F Duijsens even after working hours Mrs A Molders prevented me of making serious abuse of the English language My admiration for Carien finally is an exponential function of the patience and enthusiasm with which she supported my research Chapter I is a general introduction to the subject of linkage models and it contains few mathematical elaborations Chapters 2 to 4 use more but elementary mathematics and treat several aspects related to the derivation interpretation and estimation of linkage models Chapter 2 deals with the theory of import allocation models Chapter J treats the problem of defining and interpreting elasticities of substitution while Chapter 4 is concerned with the econometric problems related to the estimation of multivariate models with linear restrictions such as import allocation models **Macroeconometric Modeling Of Japan** Shinichi Ichimura, Lawrence R Klein, 2010-08-10 This book offers the representative macroeconometric models and their applications for the Japanese economy in different development stages throughout the postwar years up to the present It presents a summary of three types of macroeconometric models and analyses As many Asian economies are going through the stages of development that Japan has experienced over the past few decades this book will be extremely relevant to them and other developing countries as a reference for years to come

Challenges for Macroeconomic Modelling W. Driehuis, M.M.G. Fase, H. den Hartog, 2014-06-28 This book collects the revised and edited proceedings of the conference held in honour of the 50th anniversary of Professor Tinbergen s first macroeconomic policy model Written by experts both in the field of model building and policy analysis the contributions provide an invaluable overview of the state of the art and the use of macroeconomic models in our time **Exchange Rates in Multicountry Econometric Models** P. de Grauwe, Theo Peeters, 1983-12-01

Integrated Global Models of Sustainable Development - Volume III Akira Onishi, 2009-08-18 Integrated Global Models of Sustainable Development is a component of Encyclopedia of Technology Information and Systems Management Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias In

the 21st century the human society is facing the challenge of sustainable development with constraints of global environmental changes In order to cope with poverty and international per capita income disparity IPCID there should be further needs for economic development to provide employment opportunities against Terrorism and refugees The coverage in three volumes tries to show a possibility of sustainable development from a global viewpoint by using alternative policy simulations The chapters are organized so that the readers might understand archived historical trends in global modeling for sustainable development Starting from global models in the 1970s 1980s 1990s the updated latest modeling works are also included as far as possible The chapters deal with roles of integrated global models scope and methodologies and policy implications These three volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs
