**The Moon** Michael Kitt,1992      **Photographic Atlas of the Moon** S. M. Chong,Albert Lim,P. S. Ang,2002-07-25 The Photographic Atlas of the Moon is a day by day photographic guide to observing the features of the Moon through a small telescope Compiled by three keen amateur astronomers each image was produced using a 40cm telescope and high resolution low speed film Whole Moon images are provided for each day of the 29 day lunar cycle with labelled features and accompanying descriptive text Selected lunar features are shown at high magnification to highlight and clearly illustrate certain regions All lunar features are labelled using current IAU terminology A comprehensive set of appendices detail the phases of the Moon give a chronology of lunar selenography and index all lunar features named in the text This atlas is an invaluable reference guide for amateurs engaging in lunar observations with a small telescope      **Lunar Meteoroid Impacts and How to Observe Them** Brian Cudnik,2010-03-10 The genesis of modern searches for observable meteoritic phenomena on the Moon is the paper by Lincoln La Paz in Popular Astronomy magazine in 1938 In it he argued that the absence of observed fashes of meteoritic impacts on the Moon might be interpreted to mean that these bodies are destroyed as luminous meteors in an extremely rarefed lunar atmosphere The paper suggested the possibility of systematic searches for such possible lunar meteors With these concepts in mind I was surprised to note a transient moving bright speck on the Moon on July 10 1941 It appeared to behave very much as a lunar meteor would except that the poorly estimated duration would lead to a strongly hyperbolic heliocentric velocity Thus the idea of systematic searches for both p sible lunar meteors and meteoritic impact fashes was born It was appreciated that much time might need to be expended to achieve any positive results Systematic searches were carried out by others and myself chiefly in the years 1945 1965 and became a regular program at the newly founded Association of Lunar and Planetary Observers or ALPO      Journal de la Société Royale D'astronomie Du Canada Royal Astronomical Society of Canada,2009 Library catalogue in 1911 31 p appended to v 4

visit from the comfort of your backyard with the aid of nothing more sophisticated than an inexpensive telescope. It tells you the best times to view the Moon, the most exciting sights to look out for, and the best equipment to use, allowing you to snap stunning photographs as well as view the sights with your own eyes. Have you ever been inspired by stunning images from the Hubble telescope or the magic of sci-fi special effects, only to look through a small backyard telescope at the disappointing white dot of a planet or faint blur of a galaxy? Yet the Moon is different. Seen through even a relatively cheap scope, it springs into life like a real place with mountains and valleys and rugged craters. With a bit of imagination, you can even picture yourself as a sightseeing visitor there, which in a sense you are.

*Historic Tales of Flagstaff* Kevin Schindler & Michael Kitt, 2019. Flagstaff, Arizona was originally settled in the 1870s as a railroad and lumber town on the southwestern edge of the Colorado Plateau amid the ponderosa pines. Now most noted for its proximity to the Grand Canyon, the city offers a tantalizing combination of history and progress. Theodore Roosevelt, the Apollo astronauts, Walt Disney filmmakers, Navajo code talkers, and Pluto discoverer Clyde Tombaugh all feature in the area's fascinating past. Join authors Kevin Schindler and Michael Kitt as they relate the trials and triumphs that have given this town its charm from the tumultuous days of the Wild West to the fast-paced twentieth century.

*Backyard Guide to the Night Sky* Andrew Fazekas, 2019. Explore the star-studded cosmos with this fully updated, user-friendly skywatcher's guide filled with charts, graphics, photographs, and expert tips for viewing and understanding the wonders of space. Stargazing's too much fun to leave to astronomers. In these inviting pages, Night Sky Guy Andrew Fazekas takes an expert but easygoing approach that will delight would-be astronomers of all levels. Essential information, organized logically, brings the solar system stars and planets to life in your own backyard. Start with the easiest constellations and then star-hop across the night sky to find others nearby. Learn about the dark side of the moon, how to pick Mars out of a planetary lineup, and which kinds of stars twinkle in your favorite constellations. Hands-on tips and techniques for observing with the naked eye, binoculars, or a telescope help make the most out of sightings and astronomical phenomena such as eclipses and meteor showers. Photographs and graphics present key facts in an easy-to-understand format, explaining heavenly phenomena such as black holes, solar flares, and supernovas. Revised to make skywatching even easier for the whole family, this indispensable guide shines light on the night sky, truly one of the greatest shows on Earth.

**A Guide to Hubble Space Telescope Objects** James L. Chen, Adam Chen, 2015-07-16. From the authors of *How to Find the Apollo Landing Sites*, this is a guide to connecting the view above with the history of recent scientific discoveries from the Hubble Space Telescope. Each selected HST photo is shown with a sky map and a photograph or drawing to illustrate where to find it and how it should appear from a backyard telescope. Here is the casual observer's chance to locate the deep space objects visually and appreciate the historic Hubble photos in comparison to what is visible from a backyard telescope. HST objects of all types are addressed: from Messier objects, Caldwell objects, and NGC objects, and are arranged in terms of what can be seen during the seasons. Additionally, the reader is given an historical perspective on

the work of Edwin Hubble while locating and viewing the deep space objects that changed astronomy forever Countless people have seen the amazing photographs taken by the Hubble Space Telescope But how many people can actually point out where in the sky those objects are Why were these objects chosen to be studied What discoveries were made from the Hubble Space Telescope photographs This book is for anyone who wants answers to these questions     **The Stargazer's Guide to the Night Sky** Dr. Jason Lisle, 2012 Unless otherwise noted Scripture quotations are from the New King James Version of the Bible T p verso
