Secord,2015-04-03 The first half of the nineteenth century witnessed an extraordinary transformation in British political literary and intellectual life There was widespread social unrest and debates raged regarding education the lives of the working class and the new industrial machine governed world At the same time modern science emerged in Europe in more or less its current form as new disciplines and revolutionary concepts including evolution and the vastness of geologic time began to take shape In *Visions of Science* James A Secord offers a new way to capture this unique moment of change He explores seven key books among them Charles Babbage s *Reflections on the Decline of Science* Charles Lyell s *Principles of Geology* Mary Somerville s *Connexion of the Physical Sciences* and Thomas Carlyle s *Sartor Resartus* and shows how literature that reflects on the wider meaning of science can be revelatory when granted the kind of close reading usually reserved for fiction and poetry These books considered the meanings of science and its place in modern life looking to the future coordinating and connecting the sciences and forging knowledge that would be appropriate for the new age Their aim was often philosophical but Secord shows it was just as often imaginative projective and practical to suggest not only how to think about the natural world but also to indicate modes of action and potential consequences in an era of unparalleled change *Visions of Science* opens our eyes to how genteel ladies working men and the literary elite responded to these remarkable works It reveals the importance of understanding the physical qualities of books and the key role of printers and publishers from factories pouring out cheap compendia to fashionable publishing houses in London s West End Secord s vivid account takes us to the heart of an information revolution that was to have profound consequences for the making of the modern world *Catalogue of Works on European Philology and the Minor European Languages* Bernard Quaritch,1878 **Cavendish** Christa Jungnickel,Russell McCormmach,1996 The Cavendishes flourished during the high tide of British aristocracy following the revolution of 1688-89 and the case can be made that this aristocracy knew its finest hour when Henry Cavendish gently laid his delicate weights in the pan of his incomparable precision balance For this it took two generations and two kinds of invention one in social forms and the other in scientific technique This biography tells how it came to pass Book jacket **Marshall Hall (1790-1857)** Diana E.
