

himself, and there were, of course, the parents that bore Leslie's own name.

It was a bad game, with patents at stake. The Irving company held part of the ace by the end of the 1920s, and played it then with skill, whereas their competitors were threatened. When another company tried to play a card that is fast fading (hold, the referee was called in, on the basis of a United States judge. Two more actions were brought against rival firms by Irving, at this time. The case of Irving versus Russell was brought before the Supreme Court in 1931. The case was decided in favor of the Irving company. The case was decided in favor of the Irving company. The case was decided in favor of the Irving company.

In 1941 the case of *Living versus Russell* was brought before Judge Mervin of the United States Court of Delaware. The claim was for infringement of the Floyd Smith patents held by *Living*. The defendant counter-claimed that the Smith patents were themselves invalidated by prior art - meaning that the concept of manual operation had not been introduced by Floyd Smith as it had demonstrated by Leslie Lyons, but dated back to the era of Ed and Charlie Broadbent and Les Stevens. The initial hearing brought together the greatest parachute technicians of the time: Leslie Lyons came from England. First Broadbent was there, and then Lyons, and the whole of the original McCook team. Their statements under oath represent the most truthful account of parachute design that first thirty years of the century's Judge Mervin found in favour of Russell, but the decision was reversed in the appeals court. The Russell Parachute Company eventually went out of business in 1950.

In 1934, when Marjory Smith's company was making some small headway as a potential rival to the Irving monopoly in America, George White kept them in their place through a successful action for infringement of patents pertaining to shipping, storage systems and the ripened handle — the only two details of the Smith Safety Chair that Floyd Smith had failed to design around.

It is doubtful, however, if the clumsiness of the living machine, their strong hand of parents, and the skill of their apprentices could alone have retained such a hold on the parachute industry. The proven quality of the product must be considered. The primary reason why for twenty years the Irvins' chute was virtually unrivalled, that no other company been able to point to deficiencies in the Irvins' safety record, or had any of the more serious had reason to doubt the reliability of the equipment, the story would have been different. The story would then have been
