Hansen, 2008-05-27 While miracles in reproductive technology have brought joy to millions those very advances have plunged many couples into an unrelenting cycle of hope and heartbreak One failed attempt may lead to another and another but how do you give up when there is always another doctor another procedure holding out the possibility of conception and the child you yearn for Brooks Hansen vividly captures the emotional turmoil he and his wife Elizabeth endured as they tried to

conceive the years their lives were put on hold and the excruciating sense of loss He writes too of the couple's journey through the bewildering world of adoption a path to parenthood fraught with financial legal and emotional risks of its own Offering men a chance to be heard and women a rare opportunity to view the struggle with infertility from a male perspective The Brotherhood of Joseph brings to life the anger frustration humor heartbreak and sense of helplessness that come to dominate the husband's role As his remarkable account reaches its finale in Siberia however Hansen's once again becomes the story of a husband and a wife who even after years of medical frustration and fruitless paperwork still must take one last risk together and trust in their most basic instincts before their new family can be born Literary grace that has the remarkable power to act as a lens is how the New York Times Book Review has described Hansen's writing and that grace has never been more evident than in this remarkable memoir

The Autism Matrix Gil Eyal, 2013-08-26 Today autism has become highly visible Once you begin to look for it you realize it is everywhere Why We all know the answer or think we do there is an autism epidemic And if it is an epidemic then we know what must be done lots of money must be thrown at it detection centers must be established and explanations sought so that the number of new cases can be brought down and the epidemic brought under control But can it really be so simple This major new book offers a very different interpretation The authors argue that the recent rise in autism should be understood an aftershock of the real earthquake which was the deinstitutionalization of mental retardation in the mid 1970s This entailed a radical transformation not only of the institutional matrix for dealing with developmental disorders of childhood but also of the cultural lens through which we view them It opened up a space for viewing and treating childhood disorders as neither mental illness nor mental retardation neither curable nor incurable but somewhere in between The authors show that where deinstitutionalization went the furthest as in Scandinavia UK and the blue states of the US autism rates are also highest Where it was absent or delayed as in France autism rates are low Combining a historical narrative with international comparison The Autism Matrix offers a fresh and powerful analysis of a condition that affects many parents and children today

Representing Autism Stuart Fletcher Murray, 2008-06-01 From concerns of an autism epidemic to the MMR vaccine crisis autism is a source of peculiar fascination in the contemporary media Discussion of the condition has been largely framed within medicine psychiatry and education but there has been no exploration of its power within representative narrative forms Representing Autism is the first book to tackle this approach using contemporary fiction and memoir writing film photography drama and documentary together with older texts to set the contemporary fascination with autism in context Representing Autism analyses and evaluates the place of autism within contemporary culture and at the same time examines the ideas of individual and community produced by people with autism themselves to establish the ideas of autistic presence that emerge from within a space of cognitive exceptionality Central to
