F. Forest, 2007-06-30 The attacks of September 11 2001 inaugurated a new global era of counterterrorism policy and activity led by the United States Countering Terrorism and Insurgency in the 21st Century analyzes the most significant dimensions of combating terrorism including considerations of strategic and tactical issues hard power soft power and counterintelligence the need to thwart sources and facilitators weak governments ill conceived foreign policy and trafficking in drugs guns and humans and the incorporation of lessons learned thus far from combating terrorism around the globe Since the dawn of the new millennium combating terrorism has become a primary focus of security professionals throughout

the world The attacks of September 11 2001 inaugurated a new global era of counterterrorism policy and activity led by the United States while many countries from Algeria and Spain to Sri Lanka and Indonesia have redoubled their efforts to combat their own indigenous terrorism threats In the United States the counterterrorism goals identified in the National Strategy for Combating Terrorism 2006 can only be achieved through significant multinational cooperation These goals are to advance effective democracies as the long term antidote to the ideologies of terrorism to prevent attacks by terrorist networks to deny terrorists the support and sanctuary of rogue states to deny terrorists control of any nation they would use as a base and launching pad for terror and to lay the foundations and build the institutions and structures we need to carry the fight forward against terror and help ensure our ultimate success At this point in the development of the global counterterrorism efforts it is particularly important to pause for reflection on a number of critical questions What do we know about effectively countering terrorism What are the characteristics of successful or unsuccessful counterterrorism campaigns What do we need to learn in order to do this better Countering Terrorism and Insurgency in the 21st Century addresses these and related questions contributing to national security policy as well as to our understanding of the terrorist threat and how it can be defeated Volume 1 Strategic and Tactical Considerations examines issues of hard power soft power and intelligence counterintelligence Volume 2 Sources and Facilitators covers state failure border controls democracy promotion networks and trade and trafficking and societal issues Volume 3 Lessons Learned from Combating Terrorism and Insurgency includes case studies of counterterrorism operations e g the hijacking of the Achille Lauro the 1993 bombing of the World Trade Center and the capture of key terrorist suspects like Ramzi Youssef and Khalid Sheikh Mohamad and case studies of long term efforts to combat terrorism e g the Basques in Spain the Tamil Tigers in Sri Lanka Israel's struggle against Palestinian terror organizations Peru and Sendero Luminoso and Japan and Aum Shinrikyo

Choreographies of 21st Century Wars Gay Morris, Jens Richard Giersdorf, 2016-02-05 Choreographies of 21st Century Wars is the first book to analyze the interface between choreography and contemporary warfare a pertinent inquiry since choreography has long been linked to war and military training Authors from a range of disciplines reconceptualize choreography in the face of this century's never ending wars

Defining War for the 21st Century Steven Metz, Phillip R. Cuccia, 2011 The Strategic Studies Institute's XXI Annual Strategy Conference held at Carlisle Barracks from April 6-8 2010 addressed the topic of the meaning of war While it did not seek to produce a definitive answer to questions about the nature and definition of war it did highlight the crucial questions and their implications including issues such as whether the cause of war is shifting whether all forms of organized politically focused violence constitute war and the distinction between passive and active war In the report which follows Steven Metz and Philip Cuccia of SSI have summarized the presentations and debates at the conference and placed them in their wider intellectual and strategic context

War Time Sten Rynning, Olivier Schmitt, Amelie Theussen, 2021-03-02 Perceptions of time contributed to recent Western military failings The decline of the West is once again a frequent topic of speculation Often cited as one element of the alleged decline is the succession of prolonged and unsuccessful wars most notably those waged in recent decades by the United States This book by three Danish military experts examines not only the validity of the speculation but also asks why the West particularly its military effectiveness might be perceived as in decline Temporality is the central concept linking a series of structural fractures that leave the West seemingly muscle bound overwhelmingly powerful in technology and military might but strategically fragile This temporality the authors say is composed of three interrelated dimensions trajectories perceptions and pace First Western societies tend to view time as a linear trajectory focusing mostly on recent and current events and leading to the framing of history as a story of rise and decline The authors examine whether the inevitable fall already has happened is underway or is still in the future Perceptions of time also vary across cultures and periods shaping socio political activities

including warfare The enemy for example can be perceived as belong to another time being backward or barbarian And war can be seen either as cyclical or exceptional helping frame the public s willingness to accept its violent and tragic consequences The pace of war is another factor shaping policies and actions Western societies emphasize speed the shorter the war the better even if the long term result is unsuccessful Ironically one of the Western world s least successful wars also has been America s longest in Afghanistan This unique book is thus a critical assessment of the evolution and future of Western military power It contributes much needed insight into the potential for the West s political and institutional renewal

Russia and the Former Soviet Space Vasile Rotaru, Miruna Troncotă, 2018-01-23 This book represents a fresh contribution to the contemporary academic debate regarding the determinants of current Russian foreign policy assertiveness More precisely it addresses the ways in which perceived security threats have been used by Russia to legitimize its interventions in the former Soviet Space It is argued here that the security dimension has been successfully used by the Kremlin for the domestic justification of its aggressive actions in neighbouring countries and that the narrative of the besieged fortress was applied to both the war in Georgia and the intervention in Ukraine Bringing together a number of authors from Russia Ukraine Georgia Armenia Moldova Romania Germany and the UK the volume presents both local regional and Western European perspectives on the various events analysed here It will appeal to a wide range of students and professors specialized in Russia and the former Soviet space in the fields of international relations international law foreign policy analysis and security studies as well as to think tanks and policy makers

War and Warfare since 1945 Sterling Pavelec, 2017-07-28 Beginning with an exploration into the question of what war is War and Warfare since 1945 provides a chronological analysis of military history since the end of World War II extending through to an analysis of the limits of modern warfare in the nuclear age with the purpose of examining why war occurs and how it is carried out Among the types of conflict considered within the book are

state conflicts civil wars proxy wars terrorism and counterterrorism insurgency genocide Both theoretical and historical War and Warfare since 1945 also explores the definitions ethics morals and effects of the use of militaries in and after war and puts forward important questions about how wars are resolved The wars discussed include the first Arab Israeli War the Chinese Civil War the Korean War the Cold War the Vietnam War and the Iraq war The book concludes with an investigation into modern war and speculation on the changing face of warfare Perspectives on Strategy Colin S. Gray, 2013-03-28

Perspectives on Strategy examines in depth five aspects of strategy Strategic thought and behaviour are explored and explained from the perspectives of intellect morality culture geography and technology Each perspective has attracted persisting controversy Perspectives on Strategy is strongly complementary to the author's previous book The Strategy Bridge Theory for Practice OUP 2010 This new work takes a notably holistic view of strategic phenomena which serves as a master framework within which detailed examination of strategic history and issues can usefully be pursued in the light of particular perspectives Foundational for the argument in Perspectives on Strategy is the proposition that distinctive aspects of strategy e.g. ethics culture inter alia can only be appreciated properly when they are regarded in context The author shares this view with T. E. Lawrence of Arabia who wrote of the whole house of war Perspectives on Strategy gratefully adapts Lawrence and writes about the whole house of strategy The book insists that the nature of strategy is best represented by a Venn diagram that shows overlapping perspectives Thus the subject of each chapter is shown as having meaning for and in turn is influenced by the subjects of the other chapters For example the book explores the importance of strategic ideas relative to the significance of the material weapons of war The author poses the hardest of questions pertinent to each chosen perspective e.g. do ideas matter more than muscle in practice how robust is the ethical code with which warfare is waged is geography destiny as some theorists have claimed and do technically superior weapons win wars Perspectives on Strategy demonstrates that it is possible to look closely at strategic matters from limited but arguably powerful perspectives without being captured by them This book asks and answers the most challenging and rewarding questions that can be posed in order to reveal the persisting universal nature but ever changing character of strategy Lone Wolf Terror and the Rise of Leaderless Resistance George Michael, 2021-04-30

On July 22 2011 Anders Behring Breivik detonated a car bomb in downtown Oslo Norway He didn't stop there traveling several hours from the city to ambush a youth camp while the rest of Norway was distracted by his earlier attack That's where the facts end But what motivated him Did he have help staging the attacks The evidence suggests a startling truth that this was the work of one man pursuing a mission he was convinced was just If Breivik did indeed act alone he wouldn't be the first Timothy McVeigh bombed a federal building in Oklahoma City based essentially on his own motivations Eric Robert Rudolph embarked on a campaign of terror over several years including the Centennial Park bombing at the 1996 Olympics Ted Kaczynski was revealed to be the Unabomber that same year And these are only the most notable examples As George Michael demonstrates in Lone Wolf Terror and the Rise of Leaderless

Resistance they are not isolated cases Rather they represent the new way warfare will be conducted in the twenty first century Lone Wolf Terror investigates the motivations of numerous political and ideological elements such as right wing individuals ecoextremists foreign jihadists and even quasi governmental entities In all these cases those carrying out destructive acts operate as lone wolves and small cells with little or no connection to formal organizations Ultimately Michael suggests that leaderless resistance has become the most common tactical approach of political terrorists in the West and elsewhere

Handbook of Defence Politics Isaiah "Ike" Wilson III, James J.F. Forrest, 2011-03-28 Issues of defence politics and policy have long been at the forefront of political agendas and defining of international affairs However the dramatic changes to the global system that have taken place since the end of the Cold War and particularly since the terror attacks on the USA on 11 September 2001 have amplified the world's attention toward political and policy issues of national regional and global security The focus of this volume is on examining the fundamental causes of and defence policy responses to this new post 9 11 security environment Edited by Isaiah Ike Wilson III and James J F Forest of the US Military Academy West Point USA this volume is international in scope with pieces written by experts in the field offering a collection of up to date and balanced insights on key contemporary issues of concern to defence policymakers The book will be an invaluable reference tool for academics and students researchers in international relations policymakers media professionals and government officials

Ouroboros Phil W. Reynolds, 2019-07-09 Looking at partisan groups such as the FLN the Vietcong and the Mujahedeen in Afghanistan Ouroboros Understanding the War Machine of Liberalism assesses how they convert their knowledge of self into tactical and strategic advantages that nullify the Clausewitzian advantages in the distribution of military power Reynolds argues that liberalism has a global transformative mission that requires an ideologically democratic core and an illiberal periphery By assessing the ouroboros which sees action as definitive and final the book explains how it powers the new strategy of preemption that intervenes in the periphery ostensibly to set up democratic security centered adjuncts

Gangs, Pseudo-Militaries, and Other Modern Mercenaries Max G. Manwaring, 2012-10-11 As the first decade of the twenty first century has made brutally clear the very definitions of war and the enemy have changed almost beyond recognition Threats to security are now as likely to come from armed propagandists popular militias or mercenary organizations as they are from conventional armies backed by nation states In this timely book national security expert Max G Manwaring explores a little understood actor on the stage of irregular warfare the gang Since the end of the Cold War some one hundred insurgencies or irregular wars have erupted throughout the world Gangs have figured prominently in more than half of those conflicts yet these and other nonstate actors have received little focused attention from scholars or analysts This book fills that void Employing a case study approach and believing that shadows from the past often portend the future Manwaring begins with a careful consideration of the writings of V I Lenin He then scrutinizes the Piqueteros in Argentina gangs in Colombia private armies in Mexico Hugo Chavez's use of popular militias in Venezuela and the looming

threat of Al Qaeda in Western Europe As conventional warfare is increasingly eclipsed by these irregular and uncomfortable wars Manwaring boldly diagnoses the problem and recommends solutions that policymakers should heed **Contemporary Security and Strategy** Craig A. Snyder, 2011-11-29 This text brings together a range of specially commissioned chapters to provide an accessible introduction to Security Studies in the 21st century The third edition has been expanded to cover non military challenges to security and includes new learning aids
