Mathematical Combinatorics: My Philosophy Promoted on Science Internationally Linfan Mao ,2024-01-01 Mathematical science is the human recognition on the evolution laws of things that we can understand with the principle of logical consistency by mathematics i e mathematical reality So is the mathematical reality equal to the reality of thing The answer is not because there always exists contradiction between things in the eyes of human which is only a local or conditional conclusion Such a situation enables us to extend the mathematics further by combinatorics for the reality of thing from the local reality and then to get a combinatorial reality of thing This is the combinatorial conjecture for mathematical science i e CC conjecture that I put forward in my postdoctoral report for Chinese Acade my of Sciences in 2005 namely any mathematical science can be reconstructed from or made by combinatorialization After discovering its relation with Smarandache multi spaces it is then be applied to generalize mathematics over 1 dimensional topological graphs namely the mathematical combinatorics that I promoted on science internationally for more than 20 years This paper surveys how I proposed this conjecture from combinatorial topology how to use it for characterizing the non uniform groups or contradictory systems and furthermore why I introduce the continuity ow GL as a mathematical element i e vectors in Banach space over topological graphs with operations and then how to apply it to generalize a few of important conclusions in

Christianto,2006-01-01 Throughout this book we discuss some open problems in various branches of science including mathematics theoretical physics astrophysics geophysics etc It is of our hope that some of the problems discussed in this book will find their place either in theoretical exploration or further experiments while some parts of these problems may be found useful for scholarly stimulation The present book is also intended for young physics and mathematics fellows who will perhaps find the unsolved problems described here are at least worth pondering If this book provides only a few highlights of plausible solutions it is merely to keep the fun of readers in discovering the answers by themselves Bon voyage **MATHEMATICAL REALITY** Linfan MAO, A thing is complex and hybrid with other things sometimes Then what is the reality of a thing The reality of a thing is its state of existed exists or will exist in the world independent on the understanding of human beings which implies that the reality holds on by human beings maybe local or gradual not the reality of a thing Hence to hold on the reality of things is the main objective of science in the history of human development
