**Aristotle's ›Parva naturalia‹** Ronald Polansky, 2024-05-20

Aristotle's Parva naturalia continues the investigation begun in the De anima

The De anima defines the soul and treats its main powers nutrition sense perception intellection and locomotion

The Parva naturalia

On sense and sensible objects

On memory and recollection

On sleep

On dreams

On divination in sleep

On motion of animals

De motu animalium

On length and shortness of life and

On youth and old age and respiration attends more to bodily involvement with soul

While each work offers fascinating and challenging insights there has never been as extensive a commentary covering them together

A reason is that the works have often been viewed as incidental and even inconsistent

The De motu animalium has not typically been included when viewed as an isolated work on animal locomotion

This commentary argues that the treatises considered together and with the De motu among them display a tight sequence manifesting an artful yet easily overlooked design

We reveal many techniques of Aristotle's writing that have received little consideration previously

Our commentary contributes to a unified and comprehensive account of Aristotle's overall project regarding the soul and its connections with the body

**Scenting Salvation** Susan Ashbrook Harvey, 2015-08-25

This book explores the role of bodily sensory experience in early Christianity first seventh centuries AD by focusing on the importance of smell in ancient Mediterranean culture

Following its legalization in the fourth century Roman Empire Christianity cultivated a dramatically flourishing devotional piety in which the bodily senses were utilized as crucial instruments of human divine interaction

Rich olfactory practices developed as part of this shift with lavish uses of incense holy oils and other sacred scents

At the same time Christians showed profound interest in what smells could mean

How could the experience of smell be construed in revelatory terms

What specifically could it convey

How and what could be known through smell

Scenting Salvation argues that ancient Christians used olfactory experience for purposes of a distinctive religious epistemology formulating knowledge of the divine in order to yield in turn a particular human identity

Using a wide array of Pagan Jewish and Christian sources Susan Ashbrook Harvey examines the ancient understanding of smell through religious rituals liturgical practices mystagogical commentaries literary imagery homiletic conventions scientific medical and

cosmological models ascetic disciplines theological discourse and eschatological expectations In the process she argues for a richer appreciation of ancient notions of embodiment and of the roles the body might serve in religion A Copious Dictionary in Three Parts Francis Gouldman,1664 **Sense of Smell** Fred Goodwin,2001-10 *The Overland Monthly*,1911 **Overland Monthly and Out West Magazine** Bret Harte,1911
