When an unstable power is unleashed upon the worlds the Earth is left to tremble under the weight of deception as the pieces move across the board towards an inevitable and destructive war with only the hands of evil to play with them Deceit is unmasked mistrust begins to fester and curiosity that rises in so few risks being torn away as everything is left without the protection of the light As lies begin to be untold the passage of death is born to the Earth in silent horror as the fingers of the Devil reach into each and every soul of humankind with no sign of peace to lead them to safety It matters only to one being that there is salvation and yet with his will broken beyond repair the Earth faces the birth of never ending darkness entirely alone with only dust to suffocate their fragile hope for deliverance Death in Henry James A. Cutting,2005-08-10 Moving beyond established ideas of haunted Henry James this book argues that death is as important a concept for understanding James s fiction as gender sexuality and modernity which have come to dominate James studies Combining formal analysis and close reading with theoretical and historical approaches and focusing on key novels and tales from across James s career Andrew Cutting explores five instances of Jamesian death sacrifice the corpse morbidity afterlife and demography This is the first full length study of this subject Critical Approaches to the Fiction of Thomas Hardy Dale Kramer,1979-06-17

Narrative Fiction and Death Sabine Köllmann,2023-09-29 Narrative Fiction and Death Dying Imagined offers a new perspective on the study of death in literature It focuses on narrative fiction that conveys the experience of dying from the internal perspective of a dying protagonist Writers from Victor Hugo in the early 1800s to Elif Shafak in the present day have imagined the unknowable final moments on the threshold to death This literary study examines the wide range of narrative strategies used to evoke the transition from life to death and to what effect revealing not only each writer s unique way of representing the dying experience the comparative reading also finds common concerns in these texts and uncovers surprising parallels and unexplored intertextual relations between works across time and space that will interest comparatists as well as specialists in the literatures discussed Students of individual texts examined here will benefit from detailed analyses of these works The fictional evocation of dying addresses our basic human fears offering catharsis consolation and a greater cognitive and emotional understanding of that unknowable experience Presented in an engaging

and highly readable manner this study argues for literature's potential to challenge our assumptions about the end of life and change our approach to dying an aspect that will interest students and researchers of the health humanities palliative caregivers and all those interested in questions of the end of life Death, Culture & Leisure Matt

Coward-Gibbs, 2020-08-20 *Death Culture and Leisure* Playing Dead is an inter and multi disciplinary volume that engages with the diverse nexuses that exist between death culture and leisure At its heart it is a playful exploration of the way in which we play with both death and the dead *The Novels of Theodore Dreiser* Donald Pizer, 1976 Investigates the sources and composition of each of Dreiser's eight novels and interprets the themes and literary devices of his completed works

Death Representations in Literature Adriana Teodorescu, 2015-01-12 If the academic field of death studies is a prosperous one there still seems to be a level of mistrust concerning the capacity of literature to provide socially relevant information about death and to help improve the anthropological understanding of how culture is shaped by the human condition of mortality Furthermore the relationship between literature and death tends to be trivialized in the sense that death representations are interpreted in an over aestheticized manner As such this approach has a propensity to consider death in literature to be significant only for literary studies and gives rise to certain persistent clichés such as the power of literature to annihilate death This volume overcomes such stereotypes and reveals the great potential of literary studies to provide fresh and accurate ways of interrogating death as a steady and unavoidable human reality and as an ever continuing socio cultural construction The volume brings together researchers from various countries the USA the UK France Poland New Zealand Canada India Germany Greece and Romania with different academic backgrounds in fields as diverse as literature art history social studies criminology musicology and cultural studies and provides answers to questions such as What are the features of death representations in certain literary genres Is it possible to speak of an homogeneous vision of death in the case of some literary movements How do writers perceive imagine and describe their death through their personal diaries or how do they metabolize the death of the significant others through their writings To what extent does the literary representation of death refer to the extra fictional socio historically constructed Death Is it moral to represent death in children's literature What are the differences and similarities between representing death in literature and death representations in other connected fields Are metaphors and literary representations of death forms of death denial or on the contrary a more insightful way of capturing the meaning of death
