on movements such as Total Quality Management and Business Re engineering forcing management to basically rethink the theory of processes Another focus of this dissertation is on the role that technology plays in knowledge management As information professionals are traditionally concerned with technology it has been considered to look at knowledge management technology in more detail Technology is one of six key factors facilitating knowledge management The focus further on is on approaches to classify knowledge management technology and a survey of the knowledge management software market The dissertation is accomplished through a glossary of the most important technical terms in context with knowledge management as well as a list of products from knowledge management vendors The conclusion summarises the most important findings Those are that information management and knowledge management complement each other the first centring on the input process output sequence the latter around the knowledge creation of people to deal with those processes It becomes obvious that human resource management has to play its part in dealing with the soft part of knowledge management Thus technology has a minor role in introducing knowledge management in an organisation though it can play an important part in supporting knowledge related processes Most companies have already got in place the technological
