Adolescence et psychopathologie Daniel Marcelli, Alain Braconnier, Louis Tandonnet, 2018-11-13 L'adolescence est l'âge où chaque individu doit pouvoir se soucier de lui-même ou en d'autres termes développer son propre regard, une connaissance de soi et de ses limites intérieures, desquelles la capacité prendre soin de soi est un facteur fondamental de santé physique et mentale actuelle et future. Cela ne se fait ni en un jour ni par la grâce d'une génration spontanée. L'objectif le plus ambitieux de cet ouvrage qui fête ses 35 ans et accueille de nouveaux collaborateurs est d'apporter chaque professionnel au contact d'adolescents en difficulté, les connaissances et les repères lui permettant de répondre au mieux cette priorité. Daniel Marcelli, Alain Braconnier l'occasion de cette 9^e édition la structure a entièrement remanié avec l'ajout de nombreux nouveaux chapitres. L'ouvrage se présente désormais sous 4 grandes parties : les bases théoriques et généralistes, les grands regroupements syndromiques, l'approche nosographique et psychopathologie des conduites de l'adolescent dans son environnement et enfin la thérapie. Cette nouvelle édition tient compte de la sortie du DSM 5.

Psycho-oncologie Darius Razavi, Nicole Delvaux, 2019-10-22 La prise en charge des patients en oncologie implique tous les acteurs des soins : oncologues, chirurgiens, médecins généralistes, psychiatres, psychologues, infirmiers, kinésithérapeutes, etc. Les interventions sont diverses et spécifiques : les interventions préventives pour éviter le développement d'une morbidité prévisible, la réhabilitation pour réduire ou supprimer les invalidités, la chirurgie, les interventions de soutien pour accompagner le patient et ses proches lors des phases de diagnostic, de traitement, de rémission ou de survivorship, de progression, enfin la palliation pour améliorer le confort lorsqu'un traitement visé curatif ne peut plus être assuré. Le contenu de cet ouvrage reflète l'état actuel de la clinique psycho-oncologique. Les différents types d'adaptation psychologique et les troubles psychiatriques pouvant survenir sont décrits tant pour les patients que pour les proches. De nombreux concepts sont présentés et discutés : le stress, l'incertitude, la détresse, la souffrance, le déni, les attributions, la résilience, etc. Certaines problématiques particulières sont aussi présentées et développées : les comportements à risque et les facteurs de risque psychologiques liés au développement du cancer, l'adaptation et ses troubles aux différentes phases de la maladie, les troubles cognitifs, la confusion mentale, l'adaptation des proches, les réactions des adolescents et jeunes adultes, les réactions des enfants face au cancer d'un parent, la prise en charge de la douleur, les prises de décisions en fin de vie et le deuil. Les diverses interventions psychologiques spécifiques ou non, ces problématiques sont exposées : information, éducation thérapeutique, non directives et directives associées ou non, des traitements psychopharmacologiques. Les auteurs donnent une place particulière à la communication soignant-soigné et donc au rôle primordial de la formation psychologique du personnel soignant afin de permettre la transmission la plus appropriée possible des données complexes liées à la maladie et aux traitements. Cette formation est aussi primordiale pour apporter un soutien tant au patient qu'à ses proches.
