

Textile testing is checking the quality and suitability of raw material and selection of material. It is an important part for textile production, distribution, and consumption. Though it is an expensive business but essential too. There are some reasons for textile testing; such as, checking raw materials, monitoring production, assessing the final Product, investigation of faulty material, product development and research. Testing means checking, examine and verification of some items. On the other way we can define testing as; it is the process or procedure to determine the quality of a product. In this manual, We discuss about test methods, procedure and execution of the test in laboratory.
