why the gap between the school achievement of poor children and those who are better off has been so difficult to close Doris Enwistle Karl Alexander and Linda Olson show why the first grade transition how children negotiate entry into full time schooling is a crucial period They also show that events over that time have repercussions that echo throughout children s entire school careers Currently the only study of this life transition to cover a comprehensive sample and to suggest straightforward remedies for urban schools Children Schools and Inequality can inform educators practitioners and policymakers as well as researchers in the sociology of education and child development *Thesaurus of ERIC Descriptors* ,1975 *The Educator's Handbook for Understanding and Closing Achievement Gaps* Joseph Murphy,2010 Beginning with a remarkably comprehensive and accessible analysis of the gap s causes the book offers a refreshingly balanced evidence based state of the art outline of productive solutions that should inform the work of all educational stakeholders Ken Leithwood Professor OISE University of Toronto No one is better positioned than Joseph Murphy to provide lessons for education leaders on this important topic Andrew Porter George and Diane Weiss Professor of Education University of Pennsylvania For too long the achievement gap has been proclaimed discussed and then dismissed as a subject of despair Seldom has it been systematically defined placed in historical perspective or positively addressed Through thorough scholarship comprehensive knowledge and creativity this book fills that void James W Guthrie Patricia and Rodes Hart Professor of Educational Leadership and Public Policy Vanderbilt University While offering no simple pathway to progress this book reminds us how much more we can do to close achievement gaps Michael S Knapp Director Center for the Study of Teaching Policy University of Washington Distinguished researcher Joseph F Murphy has gathered and analyzed the most up to date research and data to help headteachers understand what the achievement gap is why it persists and what teachers can do about it This comprehensive handbook Examines external factors that contribute to achievement gaps such as socioeconomic status family environment racism and individual differences Covers internal factors such as instruction school culture and school support Provides strategies for addressing both internal and external factors to make an impact **The Kirghiz and Wakhi of Afghanistan** M. variety of supports including healthy meals medical care supervision and structured programs that enhance development Children that are limited by their social economic or physical environments during the summer months are at higher risk for worse academic health social and emotional and safety outcomes In contrast structured summertime activities and programs support basic developmental needs and positive outcomes for children and youth who can access and afford these programs These discrepancies in summertime experiences exacerbate pre existing academic inequities While further research is needed regarding the impact of summertime on developmental domains outside of the academic setting extensive literature exists regarding the impact of summertime on academic development trajectories However this knowledge is not sufficiently applied to policy and practice and it is important to address these inequalities Shaping Summertime Experiences examines the impact of summertime experiences on the developmental trajectories of school age children and youth across four areas of well being including academic learning social and emotional development physical and mental health and health promoting and safety behaviors It also reviews the state of science and available literature regarding the impact of summertime experiences In addition this report provides recommendations to improve the experiences of children over the summertime regarding planning access and equity and opportunities for further research and data collection
