The Wild River and the Great Dam Simon Boughton, 2024-03-12 Booklist Editors Choice NSTA CBC Best STEM Book School Library Journal Best Nonfiction Middle to High School A Booklist Top Ten Sci Tech Read A CCBC Choice Junior Library Guild Gold Standard Selection In this detailed and informative work Boughton chronicles the construction of the Hoover Dam via compellingly comprehensive text Publishers Weekly starred review This well written narrative is bound to become the authority on this modern American marvel Booklist starred review Discover the complicated history behind the construction of Hoover Dam one of the country's most recognizable and far reaching landmarks and its lasting political and environmental effects on the Colorado River and the American West At the time of its completion in 1936 Hoover Dam was the biggest dam in the world and the largest feat of architecture and engineering in the country a statement of national ambition and technical achievement It turned the wild Colorado River into a tame and securely managed water source transforming millions of acres of desert into farmland while also providing water and power to the fast growing population of the Southwest The concrete monolith quickly became a symbol of American ingenuity however its history is laden with contradiction It provided work for thousands but it was a dangerous project that exploited desperate workers during the Depression It helped secure the settlement and economies of the Southwest but at the expense of Indigenous peoples and the environment and it created a dependency on the Colorado River's water which is under threat from overuse and climate change Weaving together elements of engineering geography and political and socioeconomic history and drawing heavily from unpublished oral histories taken from dam workers and their families Simon Boughton's thoughtful and compelling debut featuring historical photographs throughout follows the construction and impact of Hoover Dam and how its promise of abundance ultimately created a river in crisis today
